Civil Engineering Database Keyword Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1972. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2002 from a CEDB keyword list. The CEDB and keyword list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Absorbers
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. — Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).

Acceleration
Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. — Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).
Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).

Acoustic waves
Reducing Dispersion of Linear Triangular Elements for the Helmholtz Equation. — Isaac Harari and Carnot L. Nogueira; 128(3), 351-8 (2002).
Time-Domain Methods for Solving Problems of Linear Acoustics. — Andrzej J. Safjan; 128(10), 1050-61 (2002).

Acoustics
Experiments to Relate Acoustic Emission Energy to Fracture Energy of Concrete. — Eric N. Landis and Lucie Baillon; 128(6), 698-702 (2002).
Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).

Adhesive bonding
Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. — Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).
Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Aerodynamics
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).
Advances in Modeling of Aerodynamic Forces on Bridge Decks. — Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).

Aeroelasticity
Observations on Low-Speed Aeroelasticity. — Robert H. Scanlan; 128(12), 1254-8 (2002).

Algorithms
Improved Damage Quantification from Elemental Modal Strain Energy Change. — Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).
Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).
Explicit Pseudodynamic Algorithm with Unconditional Stability. — Shuenn-Yih Chang; 128(9), 935-47 (2002).

Aluminum
Inelastic Cyclic Buckling of Aluminum Shear Panels. — Durgesh C. Rai; 128(11), 1233-7 (2002).

Analysis
Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).

Anisotropic materials
Torsional Surface Waves in an Initially Stressed Anisotropic Porous Medium. — S. Dey and M. G. Sarkar; 128(2), 184-9 (2002).
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. — P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Anisotropy
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).
Failure Criterion for Structural Masonry based on Critical Plane Approach. — R. Ushaksaraei and S. Pietruszczak; 128(7), 769-78 (2002).
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Arches
In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).

Asphalt mixes
Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. — Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Attenuation
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. — Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).

Axial forces
Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).

Axial loads
Analytic Solution for Finite Transversely Isotropic Circular Cylinders under the Axial Point Load Test. — X. X. Wei and K. T. Chau; 128(2), 209-19 (2002).
Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. — K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Base isolation
Protecting Base-Isolated Structures from Near-Field Ground Motion by Tuned Interaction Damper. — Yunfeng Zhang and Wilfred D. Iwan; 128(3), 287-95 (2002).
"Smart" Base Isolation Strategies Employing Magnetorheological Dampers. — H. Yoshioka, J. C. Ramallo, and B. F. Spencer, Jr.; 128(5), 540-51 (2002).
"Smart" Base Isolation Systems. — J. C. Ramallo, E. A. Johnson, and B. F. Spencer, Jr.; 128(10), 1088-99 (2002).

Bayesian analysis
Bayesian Modal Updating using Complete Input and Incomplete Response Noisy Measurements. — Ka-Veng Yuen and Lambros S. Katafygiotis; 128(3), 340-50 (2002).
Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Beams
Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. — Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).
Formulation of Cracked Beam Element for Structural Analysis. — E. Viola, L. Nobile, and L. Federici; 128(2), 220-30 (2002).
Solution Method for Beams on Nonuniform Elastic Foundations. — Ya-Jun Guo and Y. Jack Weitsman; 128(5), 592-4 (2002).
Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. — E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).
Nonclassical Modes of Unrestrained Shear Beams. — Eduardo Kausel; 128(6), 663-7 (2002).
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).

Bending
Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).
Hygrothermal Effects on the Nonlinear Bending of Shear Deformable Laminated Plates. — Hui-Shen Shen; 128(4), 493-6 (2002).

Biaxial stress
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. — Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).

Civil Engineering Database Keyword Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1972. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2002 from a CEDB keyword list. The CEDB and keyword list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Absorbers
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. — Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).

Acceleration
Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. — Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).
Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).

Acoustic waves
Reducing Dispersion of Linear Triangular Elements for the Helmholtz Equation. — Isaac Harari and Carnot L. Nogueira; 128(3), 351-8 (2002).
Time-Domain Methods for Solving Problems of Linear Acoustics. — Andrzej J. Safjan; 128(10), 1050-61 (2002).

Acoustics
Experiments to Relate Acoustic Emission Energy to Fracture Energy of Concrete. — Eric N. Landis and Lucie Baillon; 128(6), 698-702 (2002).
Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).

Adhesive bonding
Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. — Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).
Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Aerodynamics
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).
Advances in Modeling of Aerodynamic Forces on Bridge Decks. — Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).

Aeroelasticity
Observations on Low-Speed Aeroelasticity. — Robert H. Scanlan; 128(12), 1254-8 (2002).

Algorithms
Improved Damage Quantification from Elemental Modal Strain Energy Change. — Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).
Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).
Explicit Pseudodynamic Algorithm with Unconditional Stability. — Shuenn-Yih Chang; 128(9), 935-47 (2002).

Aluminum
Inelastic Cyclic Buckling of Aluminum Shear Panels. — Durgesh C. Rai; 128(11), 1233-7 (2002).

Analysis
Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).

Anisotropic materials
Torsional Surface Waves in an Initially Stressed Anisotropic Porous Medium. — S. Dey and M. G. Sarkar; 128(2), 184-9 (2002).
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. — P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Anisotropy
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).
Failure Criterion for Structural Masonry based on Critical Plane Approach. — R. Ushaksaraei and S. Pietruszczak; 128(7), 769-78 (2002).
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Arches
In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).

Asphalt mixes
Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. — Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Attenuation
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. — Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).

Axial forces
Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).

Axial loads
Analytic Solution for Finite Transversely Isotropic Circular Cylinders under the Axial Point Load Test. — X. X. Wei and K. T. Chau; 128(2), 209-19 (2002).
Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. — K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Base isolation
Protecting Base-Isolated Structures from Near-Field Ground Motion by Tuned Interaction Damper. — Yunfeng Zhang and Wilfred D. Iwan; 128(3), 287-95 (2002).
"Smart" Base Isolation Strategies Employing Magnetorheological Dampers. — H. Yoshioka, J. C. Ramallo, and B. F. Spencer, Jr.; 128(5), 540-51 (2002).
"Smart" Base Isolation Systems. — J. C. Ramallo, E. A. Johnson, and B. F. Spencer, Jr.; 128(10), 1088-99 (2002).

Bayesian analysis
Bayesian Modal Updating using Complete Input and Incomplete Response Noisy Measurements. — Ka-Veng Yuen and Lambros S. Katafygiotis; 128(3), 340-50 (2002).
Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Beams
Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. — Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).
Formulation of Cracked Beam Element for Structural Analysis. — E. Viola, L. Nobile, and L. Federici; 128(2), 220-30 (2002).
Solution Method for Beams on Nonuniform Elastic Foundations. — Ya-Jun Guo and Y. Jack Weitsman; 128(5), 592-4 (2002).
Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. — E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).
Nonclassical Modes of Unrestrained Shear Beams. — Eduardo Kausel; 128(6), 663-7 (2002).
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).

Bending
Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).
Hygrothermal Effects on the Nonlinear Bending of Shear Deformable Laminated Plates. — Hui-Shen Shen; 128(4), 493-6 (2002).

Biaxial stress
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. — Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).

Biaxial tests
Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. — Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Bifurcation
Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. — Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).
In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).

Biomechanics
Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Blast loads
Pressure-Impulse Diagram for Blast Loads Based on Dimensional Analysis and Single-Degree-of-Freedom Model. — Q. M. Li and H. Meng; 128(1), 87-92 (2002).

Blasting
Response of 1/4-Scale Concrete Masonry Unit (CMU) Walls to Blast. — Scott T. Dennis, James T. Baylot, and Stanley C. Woodson; 128(2), 134-42 (2002).

Bonding
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. — Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Boundary conditions
Element-Free Method Based on Lagrange Polynomial. — Yoshitaka Suetake; 128(2), 231-9 (2002).
Time-Harmonic Analysis of Wave Propagation in Unbounded Layered Strata with Zigzag Boundaries. — Si-Hwan Park and John L. Tassoulas; 128(3), 359-68 (2002).

Boundary element method
A Boundary Element Analysis of Quasi-Brittle Solids Containing Cracks. — F. Qin, Z. Z. Cen, and T. C. Fung; 128(2), 240-8 (2002).
Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. — D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).
Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).

Bridge decks
Advances in Modeling of Aerodynamic Forces on Bridge Decks. — Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).

Bridges
Observations on Low-Speed Aeroelasticity. — Robert H. Scanlan; 128(12), 1254-8 (2002).

Bridges, cable-stayed
Free Vibrations of Taut Cable with Attached Damper. I: Linear Viscous Damper. — J. A. Main and N. P. Jones; 128(10), 1062-71 (2002).

Bridges, spans
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).

Brittleness
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Buckling
Efficiency Limits for Slip-on Type Buckle Arrestors for Offshore Pipelines. — Stelios Kyriakides; 128(1), 102-11 (2002).
Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. — J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).
In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).
Higher-Order Finite Strip Method for Postbuckling Analysis of Imperfect Composite Plates. — Guiping Zou and Pizhong Qiao; 128(9), 1008-15 (2002).
Collapse of Composite Rings Due to Delamination Buckling Under External Pressure. — Hayder A. Rasheed and John L. Tassoulas; 128(11), 1174-81 (2002).
Inelastic Cyclic Buckling of Aluminum Shear Panels. — Durgesh C. Rai; 128(11), 1233-7 (2002).
Local Buckling of Elastically Restrained Fiber-Reinforced Plastic Plates and its Application to Box Sections. — Pizhong Qiao and Guiping Zou; 128(12), 1324-30 (2002).

Buffeting
Advances in Modeling of Aerodynamic Forces on Bridge Decks. — Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).

Building codes
Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).
Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. — J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).

Building design
Actuator Saturation and Control Design for Buildings under Seismic Excitation. — Jin-Hoon Kim and F. Jabbari; 128(4), 403-12 (2002).

Buildings, high-rise
Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).
Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". — Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).
Optimal Control Method for Seismically Excited Building Structures with Time-delay in Control. — Cai Guoping and Huang Jinzhi; 128(6), 602-12 (2002).
Could the World Trade Center have been Modified to Prevent its Collapse? — David E. Newland and David Cebon; 128(7), 795-800 (2002).

Buildings, low-rise
Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).

Buoyant jets
Turbulent Prandtl Number in Neutrally Buoyant Turbulent Round Jet. — Kuang-An Chang and Edwin A. Cowen; 128(10), 1082-7 (2002).

Cables
Generalized-α Time Integration Solutions for Hanging Chain Dynamics. — Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).
Free Vibrations of Taut Cable with Attached Damper. I: Linear Viscous Damper. — J. A. Main and N. P. Jones; 128(10), 1062-71 (2002).
Free Vibrations of Taut Cable with Attached Damper. II: Nonlinear Damper. — J. A. Main and N. P. Jones; 128(10), 1072-81 (2002).

Capacity
Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Channel flow
Turbulence Characteristics in Gradual Channel Transition. — Athanasios N. Papanicolaou and Robert Hilldale; 128(9), 948-60 (2002).

China
Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).

Coefficients
Mechanics of Composite Solids. — Stephen Whitaker; 128(8), 823-8 (2002).

Cohesive soils
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).

Collapse
Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).
Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". — Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).
Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).
Could the World Trade Center have been Modified to Prevent its Collapse? — David E. Newland and David Cebon; 128(7), 795-800 (2002).
Collapse of Composite Rings Due to Delamination Buckling Under External Pressure. — Hayder A. Rasheed and John L. Tassoulas; 128(11), 1174-81 (2002).
Lateral Confinement Needed to Suppress Softening of Concrete in Compression. — Ferhun C. Caner and Zdeněk P. Bažant; 128(12), 1304-13 (2002).

Columns
Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. — S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).
Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. — J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).

Composite materials
Hygrothermal Effects on the Nonlinear Bending of Shear Deformable Laminated Plates. — Hui-Shen Shen; 128(4), 493-6 (2002).
Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs. — Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 128(5), 552-61 (2002).

Three-Dimensional Model for Analysis of Stiffness and Hygroexpansion Properties of Fiber Composite Materials. — Kristian Stålne and Per-Johan Gustafsson; 128(6), 654-62 (2002).
Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).
Mechanics of Composite Solids. — Stephen Whitaker; 128(8), 823-8 (2002).
Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. — Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).
Collapse of Composite Rings Due to Delamination Buckling Under External Pressure. — Hayder A. Rasheed and John L. Tassoulas; 128(11), 1174-81 (2002).
Two-Phase Composite Model for High Performance Cementitious Composites. — Eugene Y. Chuang and Franz-Josef Ulm; 128(12), 1314-23 (2002).
Local Buckling of Elastically Restrained Fiber-Reinforced Plastic Plates and its Application to Box Sections. — Pizhong Qiao and Guiping Zou; 128(12), 1324-30 (2002).
Guided Lamb Wave Propagation in Composite Plate/Concrete Component. — Kritsakorn Luangvilai, Wonsiri Punurai, and Laurence J. Jacobs; 128(12), 1337-41 (2002).

Compression

Lateral Confinement Needed to Suppress Softening of Concrete in Compression. — Ferhun C. Caner and Zdeněk P. Bažant; 128(12), 1304-13 (2002).

Computation

Prediction of Flow in Centrifugal Blower Using Quasi-Steady Rotor–Stator Models. — Siddharth Thakur, Wanlai Lin, and Jeffrey Wright; 128(10), 1039-49 (2002).

Computer applications

Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. — J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).

Concentrated loads

In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).

Concentration

Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. — Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).

Concrete

Vertex Effect in Strain-Softening Concrete at Rotating Principal Axes. — Ferhun C. Caner, Zdeněk P. Bažant, and Jan Červenka; 128(1), 24-33 (2002).
Improved Lattice Model for Concrete Fracture. — A. Arslan, R. Ince, and B. L. Karihaloo; 128(1), 57-65 (2002).
Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).
Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. — S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. — Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).
Tripartite Cohesive Crack Model. — A. D. Jefferson; 128(6), 644-53 (2002).
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. — Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).
Experiments to Relate Acoustic Emission Energy to Fracture Energy of Concrete. — Eric N. Landis and Lucie Baillon; 128(6), 698-702 (2002).
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).
Lateral Confinement Needed to Suppress Softening of Concrete in Compression. — Ferhun C. Caner and Zdeněk P. Bažant; 128(12), 1304-13 (2002).
Continuous Relaxation Spectrum for Concrete Creep and its Incorporation into Microplane Model M4. — Goangseup Zi and Zdeněk P. Bažant; 128(12), 1331-6 (2002).

Concrete columns

Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Concrete masonry

Response of 1/4-Scale Concrete Masonry Unit (CMU) Walls to Blast. — Scott T. Dennis, James T. Baylot, and Stanley C. Woodson; 128(2), 134-42 (2002).

Concrete slabs

Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs. — Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 128(5), 552-61 (2002).

Concrete structures

Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

Concrete, prestressed

Application of Wigner-Ville Transform to Evaluate Tensile Forces in Seven-Wire Prestressing Strands. — Hung-Liang (Roger) Chen and Komwut Wissawapaisal; 128(11), 1206-14 (2002).

Concrete, reinforced

Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. — J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).
Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. — E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).
Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Consolidation

Coupling of Fluid Flow and Deformation in Underground Formations. — Marte S. Gutierrez and Roland W. Lewis; 128(7), 779-87 (2002).

Constitutive models

Requirements on Damage Functions. — S. Yazdani, Davis Cope, and Kevin Very; 128(1), 126-9 (2002).
Tripartite Cohesive Crack Model. — A. D. Jefferson; 128(6), 644-53 (2002).
Two-Phase Composite Model for High Performance Cementitious Composites. — Eugene Y. Chuang and Franz-Josef Ulm; 128(12), 1314-23 (2002).

Constitutive relations

Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).
Homogenized Strategy toward Constitutive Identification of Masonry. — Antonella Cecchi and Robert Di Marco; 128(6), 688-97 (2002).

Contacts

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Containers

Similarity Shapes of an Inclined, Partially Filled Membrane Container. — C. Y. Wang; 128(2), 249-51 (2002).

Control methods

Optimal Control Method for Seismically Excited Building Structures with Time-delay in Control. — Cai Guoping and Huang Jinzhi; 128(6), 602-12 (2002).

Control systems

Actuator Saturation and Control Design for Buildings under Seismic Excitation. — Jin-Hoon Kim and F. Jabbari; 128(4), 403-12 (2002).

Coupling

Stable Boundary Element Method/Finite Element Method Procedure for Dynamic Fluid–Structure Interactions. — G. Y. Yu, S. T. Lie, and S. C. Fan; 128(9), 909-15 (2002).

Crack propagation

Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Cracking

Formulation of Cracked Beam Element for Structural Analysis. — E. Viola, L. Nobile, and L. Federici; 128(2), 220-30 (2002).
A Boundary Element Analysis of Quasi-Brittle Solids Containing Cracks. — F. Qin, Z. Z. Cen, and T. C. Fung; 128(2), 240-8 (2002).
Tripartite Cohesive Crack Model. — A. D. Jefferson; 128(6), 644-53 (2002).
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. — Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).
Effective Toughness of Damaged Solids Containing Ribbon Cracks. — Huang Hsing Pan; 128(7), 742-7 (2002).
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. — V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Nonlocal Integral Formulations of Plasticity and Damage: Survey of Progress. — Zdeněk P. Bažant and Milan Jirásek; 128(11), 1119-49 (2002).

Creep

Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. — E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).

Continuous Relaxation Spectrum for Concrete Creep and its Incorporation into Microplane Model M4. — Goangseup Zi and Zdeněk P. Bažant; 128(12), 1331-6 (2002).

Cyclic loads

Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. — S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).

Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Inelastic Cyclic Buckling of Aluminum Shear Panels. — Durgesh C. Rai; 128(11), 1233-7 (2002).

Cylinders

Analytic Solution for Finite Transversely Isotropic Circular Cylinders under the Axial Point Load Test. — X. X. Wei and K. T. Chau; 128(2), 209-19 (2002).

Cylindrical shells

Postbuckling of Shear Deformable Laminated Cylindrical Shells. — Hui-Shen Shen; 128(3), 296-307 (2002).

Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. — K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Damage

Load Vectors for Damage Localization. — Dionisio Bernal; 128(1), 7-14 (2002).

Requirements on Damage Functions. — S. Yazdani, Davis Cope, and Kevin Very; 128(1), 126-9 (2002).

Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

Improved Damage Quantification from Elemental Modal Strain Energy Change. — Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).

Tripartite Cohesive Crack Model. — A. D. Jefferson; 128(6), 644-53 (2002).

Damage Accumulation in Glass Plates. — Massimiliano Gioffrè and Vittorio Gusella; 128(7), 801-5 (2002).

Nonlocal Integral Formulations of Plasticity and Damage: Survey of Progress. — Zdeněk P. Bažant and Milan Jirásek; 128(11), 1119-49 (2002).

Damping

Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. — Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).

Protecting Base-Isolated Structures from Near-Field Ground Motion by Tuned Interaction Damper. — Yunfeng Zhang and Wilfred D. Iwan; 128(3), 287-95 (2002).

Dynamics of Nonviscously Damped Linear Systems. — S. Adhikari; 128(3), 328-39 (2002).

Coupled Waveform Analysis in Dynamic Characterization of Lossy Solids. — Bojan B. Guzina and Anjun Lu; 128(4), 392-402 (2002).

"Smart" Base Isolation Strategies Employing Magnetorheological Dampers. — H. Yoshioka, J. C. Ramallo, and B. F. Spencer, Jr.; 128(5), 540-51 (2002).

Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).

Tuned Mass Damper Design for Optimally Minimizing Fatigue Damage. — Hua-Jun Li and Sau-Lon James Hu; 128(6), 703-7 (2002).

Mathematical Model for Design of Mass Dampers for Wind Excited Structures. — Massimiliano Mattei and Francesco Ricciardelli; 128(9), 979-88 (2002).

Free Vibrations of Taut Cable with Attached Damper. I: Linear Viscous Damper. — J. A. Main and N. P. Jones; 128(10), 1062-71 (2002).

Free Vibrations of Taut Cable with Attached Damper. II: Nonlinear Damper. — J. A. Main and N. P. Jones; 128(10), 1072-81 (2002).

"Smart" Base Isolation Systems. — J. C. Ramallo, E. A. Johnson, and B. F. Spencer, Jr.; 128(10), 1088-99 (2002).

Damping ratio

Free Vibrations of Taut Cable with Attached Damper. II: Nonlinear Damper. — J. A. Main and N. P. Jones; 128(10), 1072-81 (2002).

Dams, arch

Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. — Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Databases

Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).

Decomposition

Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. — Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).

Deformation

Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. — Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Coupling of Fluid Flow and Deformation in Underground Formations. — Marte S. Gutierrez and Roland W. Lewis; 128(7), 779-87 (2002).

Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Deformation analysis

Displacement Accuracy of Discontinuous Deformation Analysis Method Applied to Sliding Block. — David M. Doolin and Nicholas Sitar; 128(11), 1158-68 (2002).

Delay time

Optimal Control Method for Seismically Excited Building Structures with Time-delay in Control. — Cai Guoping and Huang Jinzhi; 128(6), 602-12 (2002).

Design

Free Vibration Analysis and Design Aids of Stiffened Conoidal Shells. — A. N. Nayak and J. N. Bandyopadhyay; 128(4), 419-27 (2002).

Tuned Mass Damper Design for Optimally Minimizing Fatigue Damage. — Hua-Jun Li and Sau-Lon James Hu; 128(6), 703-7 (2002).

Mathematical Model for Design of Mass Dampers for Wind Excited Structures. — Massimiliano Mattei and Francesco Ricciardelli; 128(9), 979-88 (2002).

Digital techniques

An Optical Approach to Structural Displacement Measurement and Its Application. — Gongkang Fu and Adil G. Moosa; 128(5), 511-20 (2002).

Dimensional analysis

Pressure-Impulse Diagram for Blast Loads Based on Dimensional Analysis and Single-Degree-of-Freedom Model. — Q. M. Li and H. Meng; 128(1), 87-92 (2002).

Disasters

Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).

Discrete elements

Displacement Accuracy of Discontinuous Deformation Analysis Method Applied to Sliding Block. — David M. Doolin and Nicholas Sitar; 128(11), 1158-68 (2002).

Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. — Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Dispersion

Reducing Dispersion of Linear Triangular Elements for the Helmholtz Equation. — Isaac Harari and Carnot L. Nogueira; 128(3), 351-8 (2002).

Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).

Displacement

Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).

An Optical Approach to Structural Displacement Measurement and Its Application. — Gongkang Fu and Adil G. Moosa; 128(5), 511-20 (2002).

Drilling

New Triangular Plane Element with Drilling Degrees of Freedom. — Petr Fajman; 128(4), 413-8 (2002).

Ductility

Two-Phase Composite Model for High Performance Cementitious Composites. — Eugene Y. Chuang and Franz-Josef Ulm; 128(12), 1314-23 (2002).

Dynamic analysis
Dynamic Response of Plates on Elastic Foundation to Moving Loads. — M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. — Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).

Dynamic characteristics
Nonclassical Modes of Unrestrained Shear Beams. — Eduardo Kausel; 128(6), 663-7 (2002).

Dynamic loads
Dynamic Response of Plates on Elastic Foundation to Moving Loads. — M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).

Dynamic response
Time Domain Analysis on the Dynamic Response of a Flexible Floating Structure to Waves. — Xiaodong Liu and Shigeki Sakai; 128(1), 48-56 (2002).
Effect of Nonlinear Wave Kinematics on Dynamic Response of Spars. — Iftekhar Anam and Jose M. Roesset; 128(9), 925-34 (2002).
Dynamic Response of Plates on Elastic Foundation to Moving Loads. — M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).

Dynamic responses
Stability and Delay Compensation for Real-Time Substructure Testing. — A. P. Darby, M. S. Williams, and A. Blakeborough; 128(12), 1276-84 (2002).

Dynamics
Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". — Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).
Generalized-α Time Integration Solutions for Hanging Chain Dynamics. — Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).

Earthquake engineering
Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. — Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Earthquake excitation
Actuator Saturation and Control Design for Buildings under Seismic Excitation. — Jin-Hoon Kim and F. Jabbari; 128(4), 403-12 (2002).
"Smart" Base Isolation Strategies Employing Magnetorheological Dampers. — H. Yoshioka, J. C. Ramallo, and B. F. Spencer, Jr.; 128(5), 540-51 (2002).
Optimal Control Method for Seismically Excited Building Structures with Time-delay in Control. — Cai Guoping and Huang Jinzhi; 128(6), 602-12 (2002).

Earthquake resistant structures
Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. — Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).

Earthquakes
Earthquake Response and Energy Evaluation of Inelastic Structures. — Kevin K. F. Wong and Rong Yang; 128(3), 308-17 (2002).
Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. — Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).
Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).
Influence of Permeability on Liquefaction-Induced Shear Deformation. — Zhaohui Yang and Ahmed Elgamal; 128(7), 720-9 (2002).
"Smart" Base Isolation Systems. — J. C. Ramallo, E. A. Johnson, and B. F. Spencer, Jr.; 128(10), 1088-99 (2002).

Edge effect
Edge Effects in Pressurized Membranes. — Tang-Tat Ng; 128(10), 1100-4 (2002).

Effective stress
Micromechanical Basis of Concept of Effective Stress. — Anjani Kumar Didwania; 128(8), 864-8 (2002).

Efficiency
Efficiency Limits for Slip-on Type Buckle Arrestors for Offshore Pipelines. — Stelios Kyriakides; 128(1), 102-11 (2002).

Elastic analysis
Homogenized Strategy toward Constitutive Identification of Masonry. — Antonella Cecchi and Robert Di Marco; 128(6), 688-97 (2002).

Elastic foundations
Solution Method for Beams on Nonuniform Elastic Foundations. — Ya-Jun Guo and Y. Jack Weitsman; 128(5), 592-4 (2002).
Dynamic Response of Plates on Elastic Foundation to Moving Loads. — M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).

Elasticity
Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).
Simple Nonlinear Model for Elastic Response of Cohesionless Granular Materials. — E. Taciroglu and K. D. Hjelmstad; 128(9), 969-78 (2002).
Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).

Elastomer
Bending Stiffness of Fiber-Reinforced Circular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(11), 1150-7 (2002).

Elastoplasticity
Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. — Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).
Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. — Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).
Material Identification Procedure for Elastoplastic Drucker–Prager Model. — Juan José López Cela; 128(5), 586-91 (2002).
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).

Energy
Earthquake Response and Energy Evaluation of Inelastic Structures. — Kevin K. F. Wong and Rong Yang; 128(3), 308-17 (2002).
Experiments to Relate Acoustic Emission Energy to Fracture Energy of Concrete. — Eric N. Landis and Lucie Baillon; 128(6), 698-702 (2002).

Engineering mechanics
Some Historical and Future Aspects of Engineering Mechanics. — Ching-Jen Chen and Yousef Haik; 128(12), 1242-53 (2002).

Errors
Moving Loads Identification Through Regularization. — X. Q. Zhu and S. S. Law; 128(9), 989-1000 (2002).

Excitation
Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. — Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Explosives
Response of 1/4-Scale Concrete Masonry Unit (CMU) Walls to Blast. — Scott T. Dennis, James T. Baylot, and Stanley C. Woodson; 128(2), 134-42 (2002).

External pressure
Collapse of Composite Rings Due to Delamination Buckling Under External Pressure. — Hayder A. Rasheed and John L. Tassoulas; 128(11), 1174-81 (2002).

Fatigue
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. — Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).
Tuned Mass Damper Design for Optimally Minimizing Fatigue Damage. — Hua-Jun Li and Sau-Lon James Hu; 128(6), 703-7 (2002).

Fiber composites
Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. — S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).

Fiber optics
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. — Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Fiber reinforced materials
Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. — Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).
Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).
Stiffness Analysis of Fiber-Reinforced Rectangular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(4), 462-70 (2002).
Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs. — Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 128(5), 552-61 (2002).
Bending Stiffness of Fiber-Reinforced Circular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(11), 1150-7 (2002).

Two-Phase Composite Model for High Performance Cementitious Composites. — Eugene Y. Chuang and Franz-Josef Ulm; 128(12), 1314-23 (2002).
Local Buckling of Elastically Restrained Fiber-Reinforced Plastic Plates and its Application to Box Sections. — Pizhong Qiao and Guiping Zou; 128(12), 1324-30 (2002).

Fibers
Three-Dimensional Model for Analysis of Stiffness and Hygroexpansion Properties of Fiber Composite Materials. — Kristian Stålne and Per-Johan Gustafsson; 128(6), 654-62 (2002).

Finite difference method
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).

Finite differences
Generalized-α Time Integration Solutions for Hanging Chain Dynamics. — Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).

Finite element method
Stochastic Finite-Element Analysis of Seismic Soil–Structure Interaction. — Dan M. Ghiocel and Roger G. Ghanem; 128(1), 66-77 (2002).
Latin Hypercube Sampling for Stochastic Finite Element Analysis. — Anders M. J. Olsson and Göran E. Sandberg; 128(1), 121-5 (2002).
Effective Hybrid/Mixed Finite Elements for Folded-Plate Structures. — M. Duan and Y. Miyamoto; 128(2), 202-8 (2002).
Time-Harmonic Analysis of Wave Propagation in Unbounded Layered Strata with Zigzag Boundaries. — Si-Hwan Park and John L. Tassoulas; 128(3), 359-68 (2002).
Free Vibration Analysis and Design Aids of Stiffened Conoidal Shells. — A. N. Nayak and J. N. Bandyopadhyay; 128(4), 419-27 (2002).
Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. — Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).
Simple Nonlinear Model for Elastic Response of Cohesionless Granular Materials. — E. Taciroglu and K. D. Hjelmstad; 128(9), 969-78 (2002).
Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. — Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Finite elements
Reducing Dispersion of Linear Triangular Elements for the Helmholtz Equation. — Isaac Harari and Carnot L. Nogueira; 128(3), 351-8 (2002).
New Triangular Plane Element with Drilling Degrees of Freedom. — Petr Fajman; 128(4), 413-8 (2002).
Time-Domain Methods for Solving Problems of Linear Acoustics. — Andrzej J. Safjan; 128(10), 1050-61 (2002).
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Finite strip method
Higher-Order Finite Strip Method for Postbuckling Analysis of Imperfect Composite Plates. — Guiping Zou and Pizhong Qiao; 128(9), 1008-15 (2002).
Dynamic Response of Plates on Elastic Foundation to Moving Loads. — M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).

Floating ice
Size Effect on Strength of Floating Sea Ice under Vertical Line Load. — Zdeněk P. Bažant and Zaoyang Guo; 128(3), 254-63 (2002).

Floating structures
Time Domain Analysis on the Dynamic Response of a Flexible Floating Structure to Waves. — Xiaodong Liu and Shigeki Sakai; 128(1), 48-56 (2002).

Flow
Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).

Fluid flow
Coupling of Fluid Flow and Deformation in Underground Formations. — Marte S. Gutierrez and Roland W. Lewis; 128(7), 779-87 (2002).
Prediction of Flow in Centrifugal Blower Using Quasi-Steady Rotor–Stator Models. — Siddharth Thakur, Wanlai Lin, and Jeffrey Wright; 128(10), 1039-49 (2002).

Fluid-structure interaction
Stable Boundary Element Method/Finite Element Method Procedure for Dynamic Fluid–Structure Interactions. — G. Y. Yu, S. T. Lie, and S. C. Fan; 128(9), 909-15 (2002).

Flutter
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).
Advances in Modeling of Aerodynamic Forces on Bridge Decks. — Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).

Folded plates
Effective Hybrid/Mixed Finite Elements for Folded-Plate Structures. — M. Duan and Y. Miyamoto; 128(2), 202-8 (2002).

Foundations
Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. — D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).

Fracture mechanics
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. — Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).

Fractures
Improved Lattice Model for Concrete Fracture. — A. Arslan, R. Ince, and B. L. Karihaloo; 128(1), 57-65 (2002).
Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).
Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).
Tripartite Cohesive Crack Model. — A. D. Jefferson; 128(6), 644-53 (2002).
Experiments to Relate Acoustic Emission Energy to Fracture Energy of Concrete. — Eric N. Landis and Lucie Baillon; 128(6), 698-702 (2002).
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. — P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Frames
Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. — J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).

Free surfaces
Effect of Nonlinear Wave Kinematics on Dynamic Response of Spars. — Iftekhar Anam and Jose M. Roesset; 128(9), 925-34 (2002).

Frequency
Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. — Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).

Friction
Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).

Friction coefficiency
Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. — Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).

Gaussian process
Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. — Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).
Non-Gaussian Model for Ringing Phenomena in Offshore Structures. — Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).
Damage Accumulation in Glass Plates. — Massimiliano Gioffrè and Vittorio Gusella; 128(7), 801-5 (2002).

Geometric nonlinearity
Thermomechanical Postbuckling of Cross-Ply Laminated Rectangular Plates. — K. K. Shukla and Y. Nath; 128(1), 93-101 (2002).

Geometry
Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. — Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Glass plates
Damage Accumulation in Glass Plates. — Massimiliano Gioffrè and Vittorio Gusella; 128(7), 801-5 (2002).

Granular materials
Micromechanics of Unsaturated Granular Media. — Xavier Chateau, Pascal Moucheront, and Olivier Pitois; 128(8), 856-63 (2002).
Simple Nonlinear Model for Elastic Response of Cohesionless Granular Materials. — E. Taciroglu and K. D. Hjelmstad; 128(9), 969-78 (2002).

Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. — Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Graphic analysis

Graphical Relationship among Lamé Ellipsoid and Mohr's Circles. A Graphical View of Mohr's Circles. — Francisco J. Montáns; 128(3), 371-5 (2002).

Gravity

Effect of Gravity and Initial Stress on Torsional Surface Waves in Dry Sandy Medium. — S. Dey, Asit Kr. Gupta, and S. Gupta; 128(10), 1115-8 (2002).

Gravity loads

Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. — J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).

Green's function

Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).

Solution Method for Beams on Nonuniform Elastic Foundations. — Ya-Jun Guo and Y. Jack Weitsman; 128(5), 592-4 (2002).

Ground motion

Protecting Base-Isolated Structures from Near-Field Ground Motion by Tuned Interaction Damper. — Yunfeng Zhang and Wilfred D. Iwan; 128(3), 287-95 (2002).

Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. — D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).

Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. — Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).

Saturation Effects of Soils on Ground Motion at Free Surface Due to Incident SV Waves. — Jun Yang; 128(12), 1295-303 (2002).

Heat transfer

Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).

Heterogeneity

Continuum Micromechanics: Survey. — André Zaoui; 128(8), 808-16 (2002).

History

Some Historical and Future Aspects of Engineering Mechanics. — Ching-Jen Chen and Yousef Haik; 128(12), 1242-53 (2002).

Homogeneity

Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).

Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. — P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Homogenized Behavior Equations for Porous Bingham Viscoplastic Material. — Gilles Perrin; 128(8), 885-8 (2002).

Hydraulic jump

Plane Turbulent Wall Jets in Shallow Tailwater. — S. A. Ead and N. Rajaratnam; 128(2), 143-55 (2002).

Hydroelasticity

Time Domain Analysis on the Dynamic Response of a Flexible Floating Structure to Waves. — Xiaodong Liu and Shigeki Sakai; 128(1), 48-56 (2002).

Identification

Moving Loads Identification Through Regularization. — X. Q. Zhu and S. S. Law; 128(9), 989-1000 (2002).

Imaging techniques

Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

An Optical Approach to Structural Displacement Measurement and Its Application. — Gongkang Fu and Adil G. Moosa; 128(5), 511-20 (2002).

Turbulent Prandtl Number in Neutrally Buoyant Turbulent Round Jet. — Kuang-An Chang and Edwin A. Cowen; 128(10), 1082-7 (2002).

Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. — Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Impact

Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". — Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).

Impellers

Prediction of Flow in Centrifugal Blower Using Quasi-Steady Rotor–Stator Models. — Siddharth Thakur, Wanlai Lin, and Jeffrey Wright; 128(10), 1039-49 (2002).

Inclusions

Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. — Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).

Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Inelastic action

Vertex Effect in Strain-Softening Concrete at Rotating Principal Axes. — Ferhun C. Caner, Zdeněk P. Bažant, and Jan Červenka; 128(1), 24-33 (2002).

Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. — Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).

Earthquake Response and Energy Evaluation of Inelastic Structures. — Kevin K. F. Wong and Rong Yang; 128(3), 308-17 (2002).

Infrastructure

Redundancy Index of Lifeline Systems. — Masaru Hoshiya and Kinya Yamamoto; 128(9), 961-8 (2002).

Input-output analysis

Bayesian Modal Updating using Complete Input and Incomplete Response Noisy Measurements. — Ka-Veng Yuen and Lambros S. Katafygiotis; 128(3), 340-50 (2002).

Interactions

Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).

Isotropy

Analytic Solution for Finite Transversely Isotropic Circular Cylinders under the Axial Point Load Test. — X. X. Wei and K. T. Chau; 128(2), 209-19 (2002).

Kinematics

Effect of Nonlinear Wave Kinematics on Dynamic Response of Spars. — Iftekhar Anam and Jose M. Roesset; 128(9), 925-34 (2002).

Laminar flow

Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).

Laminates

Postbuckling of Shear Deformable Laminated Cylindrical Shells. — Hui-Shen Shen; 128(3), 296-307 (2002).

Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. — K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Higher-Order Finite Strip Method for Postbuckling Analysis of Imperfect Composite Plates. — Guiping Zou and Pizhong Qiao; 128(9), 1008-15 (2002).

Large structures

Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).

Lattices

Improved Lattice Model for Concrete Fracture. — A. Arslan, R. Ince, and B. L. Karihaloo; 128(1), 57-65 (2002).

Launching

Edge Effects in Pressurized Membranes. — Tang-Tat Ng; 128(10), 1100-4 (2002).

Layered systems

Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).

Linear systems

Dynamics of Nonviscously Damped Linear Systems. — S. Adhikari; 128(3), 328-39 (2002).

Linearity

Time-Domain Methods for Solving Problems of Linear Acoustics. — Andrzej J. Safjan; 128(10), 1050-61 (2002).

Liquefaction

Influence of Permeability on Liquefaction-Induced Shear Deformation. — Zhaohui Yang and Ahmed Elgamal; 128(7), 720-9 (2002).

Load transfer

Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Loads

Moving Loads Identification Through Regularization. — X. Q. Zhu and S. S. Law; 128(9), 989-1000 (2002).

Localization

Load Vectors for Damage Localization. — Dionisio Bernal; 128(1), 7-14 (2002).

Nonlocal Integral Formulations of Plasticity and Damage: Survey of Progress. — Zdeněk P. Bažant and Milan Jirásek; 128(11), 1119-49 (2002).

Loess

Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).

Markov chain

Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Masonry

Homogenized Strategy toward Constitutive Identification of Masonry. — Antonella Cecchi and Robert Di Marco; 128(6), 688-97 (2002).

Failure Criterion for Structural Masonry based on Critical Plane Approach. — R. Ushaksaraei and S. Pietruszczak; 128(7), 769-78 (2002).

Mass

Forced Vibrations of Single-Degree-of-Freedom Systems with Nonperiodically Time-Varying Parameters. — Q. S. Li; 128(12), 1267-75 (2002).

Material failure

Failure Criterion for Structural Masonry based on Critical Plane Approach. — R. Ushaksaraei and S. Pietruszczak; 128(7), 769-78 (2002).

Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. — P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Material properties

Material Identification Procedure for Elastoplastic Drucker–Prager Model. — Juan José López Cela; 128(5), 586-91 (2002).

Continuum Micromechanics: Survey. — André Zaoui; 128(8), 808-16 (2002).

Mathematical models

Mathematical Model for Design of Mass Dampers for Wind Excited Structures. — Massimiliano Mattei and Francesco Ricciardelli; 128(9), 979-88 (2002).

Measurement

An Optical Approach to Structural Displacement Measurement and Its Application. — Gongkang Fu and Adil G. Moosa; 128(5), 511-20 (2002).

Turbulent Prandtl Number in Neutrally Buoyant Turbulent Round Jet. — Kuang-An Chang and Edwin A. Cowen; 128(10), 1082-7 (2002).

Mechanics

Mechanics of Composite Solids. — Stephen Whitaker; 128(8), 823-8 (2002).

Membranes

Similarity Shapes of an Inclined, Partially Filled Membrane Container. — C. Y. Wang; 128(2), 249-51 (2002).

Edge Effects in Pressurized Membranes. — Tang-Tat Ng; 128(10), 1100-4 (2002).

Metals

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Micromechanics

Continuum Micromechanics: Survey. — André Zaoui; 128(8), 808-16 (2002).

Extension of Poroelastic Analysis to Double-Porosity Materials: New Technique in Microgeomechanics. — James G. Berryman; 128(8), 840-7 (2002).

Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. — V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).

Micromechanics of Unsaturated Granular Media. — Xavier Chateau, Pascal Moucheront, and Olivier Pitois; 128(8), 856-63 (2002).

Micromechanical Basis of Concept of Effective Stress. — Anjani Kumar Didwania; 128(8), 864-8 (2002).

Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. — Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).

Homogenized Behavior Equations for Porous Bingham Viscoplastic Material. — Gilles Perrin; 128(8), 885-8 (2002).

Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Microstructure

Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).

Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. — Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Microwaves

Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

Mineral analysis

Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Models

Improved Lattice Model for Concrete Fracture. — A. Arslan, R. Ince, and B. L. Karihaloo; 128(1), 57-65 (2002).

Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).

Material Identification Procedure for Elastoplastic Drucker–Prager Model. — Juan José López Cela; 128(5), 586-91 (2002).

Non-Gaussian Model for Ringing Phenomena in Offshore Structures. — Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).

Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).

Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Monte Carlo method

Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Morphology

Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Motion

Nonclassical Modes of Unrestrained Shear Beams. — Eduardo Kausel; 128(6), 663-7 (2002).

Moving Loads Identification Through Regularization. — X. Q. Zhu and S. S. Law; 128(9), 989-1000 (2002).

New York

Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).

Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". — Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).

Could the World Trade Center have been Modified to Prevent its Collapse? — David E. Newland and David Cebon; 128(7), 795-800 (2002).

New York City

Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).

Could the World Trade Center have been Modified to Prevent its Collapse? — David E. Newland and David Cebon; 128(7), 795-800 (2002).

Nondestructive tests

Application of Wigner-Ville Transform to Evaluate Tensile Forces in Seven-Wire Prestressing Strands. — Hung-Liang (Roger) Chen and Komwut Wissawapaisal; 128(11), 1206-14 (2002).

Nonlinear analysis

New Triangular Plane Element with Drilling Degrees of Freedom. — Petr Fajman; 128(4), 413-8 (2002).

Numerical Analysis for the Nonlinear Free Vibration of Shallow Shells. — Anand V. Singh and Kang Lan; 128(12), 1259-66 (2002).

Nonlinear responses

Generalized-α Time Integration Solutions for Hanging Chain Dynamics. — Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).

Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. — Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).

Nonlinear systems

Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. — Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Nonproportional loads
Vertex Effect in Strain-Softening Concrete at Rotating Principal Axes. — Ferhun C. Caner, Zdeněk P. Bažant, and Jan Červenka; 128(1), 24-33 (2002).

Numerical analysis
Element-Free Method Based on Lagrange Polynomial. — Yoshitaka Suetake; 128(2), 231-9 (2002).
Solution Method for Beams on Nonuniform Elastic Foundations. — Ya-Jun Guo and Y. Jack Weitsman; 128(5), 592-4 (2002).
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).
Edge Effects in Pressurized Membranes. — Tang-Tat Ng; 128(10), 1100-4 (2002).

Numerical models
Dynamics of Nonviscously Damped Linear Systems. — S. Adhikari; 128(3), 328-39 (2002).
Generalized-α Time Integration Solutions for Hanging Chain Dynamics. — Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).

Offshore pipelines
Efficiency Limits for Slip-on Type Buckle Arrestors for Offshore Pipelines. — Stelios Kyriakides; 128(1), 102-11 (2002).

Offshore structures
Non-Gaussian Model for Ringing Phenomena in Offshore Structures. — Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).

Optimization
Tuned Mass Damper Design for Optimally Minimizing Fatigue Damage. — Hua-Jun Li and Sau-Lon James Hu; 128(6), 703-7 (2002).

Optimization design
Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).

Organic matter
Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Panels
Inelastic Cyclic Buckling of Aluminum Shear Panels. — Durgesh C. Rai; 128(11), 1233-7 (2002).

Particles
Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. — Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).
Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. — Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Passive control
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).

Pavements
Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).
Simple Nonlinear Model for Elastic Response of Cohesionless Granular Materials. — E. Taciroglu and K. D. Hjelmstad; 128(9), 969-78 (2002).

Permeability
Influence of Permeability on Liquefaction-Induced Shear Deformation. — Zhaohui Yang and Ahmed Elgamal; 128(7), 720-9 (2002).

Pipe flow
Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. — Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).
Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).

Pipes
Efficiency Limits for Slip-on Type Buckle Arrestors for Offshore Pipelines. — Stelios Kyriakides; 128(1), 102-11 (2002).
Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).

Plane strain
Time-Harmonic Analysis of Wave Propagation in Unbounded Layered Strata with Zigzag Boundaries. — Si-Hwan Park and John L. Tassoulas; 128(3), 359-68 (2002).

Plastic theory
Tripartite Cohesive Crack Model. — A. D. Jefferson; 128(6), 644-53 (2002).

Plasticity
Nonlocal Integral Formulations of Plasticity and Damage: Survey of Progress. — Zdeněk P. Bažant and Milan Jirásek; 128(11), 1119-49 (2002).

Plates
Thermomechanical Postbuckling of Cross-Ply Laminated Rectangular Plates. — K. K. Shukla and Y. Nath; 128(1), 93-101 (2002).
Wave Diffraction by a Vertical Cylinder with a Porous Ring Plate. — Jianhua Wu and Allen T. Chwang; 128(2), 164-71 (2002).
Hygrothermal Effects on the Nonlinear Bending of Shear Deformable Laminated Plates. — Hui-Shen Shen; 128(4), 493-6 (2002).
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).
Higher-Order Finite Strip Method for Postbuckling Analysis of Imperfect Composite Plates. — Guiping Zou and Pizhong Qiao; 128(9), 1008-15 (2002).
Dynamic Response of Plates on Elastic Foundation to Moving Loads. — M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).
Numerical Analysis for the Nonlinear Free Vibration of Shallow Shells. — Anand V. Singh and Kang Lan; 128(12), 1259-66 (2002).
Thermoelastic Stability of Layer Bonded to Half Plane. — Derek T. Schade and Dale G. Karr; 128(12), 1285-94 (2002).
Local Buckling of Elastically Restrained Fiber-Reinforced Plastic Plates and its Application to Box Sections. — Pizhong Qiao and Guiping Zou; 128(12), 1324-30 (2002).
Guided Lamb Wave Propagation in Composite Plate/Concrete Component. — Kritsakorn Luangvilai, Wonsiri Punurai, and Laurence J. Jacobs; 128(12), 1337-41 (2002).

Poisson ratio
Analytic Solution for Finite Transversely Isotropic Circular Cylinders under the Axial Point Load Test. — X. X. Wei and K. T. Chau; 128(2), 209-19 (2002).

Polymer
Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

Polymer concrete
Guided Lamb Wave Propagation in Composite Plate/Concrete Component. — Kritsakorn Luangvilai, Wonsiri Punurai, and Laurence J. Jacobs; 128(12), 1337-41 (2002).

Polynomials
Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. — Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).
Element-Free Method Based on Lagrange Polynomial. — Yoshitaka Suetake; 128(2), 231-9 (2002).

Poroelasticity
Extension of Poroelastic Analysis to Double-Porosity Materials: New Technique in Microgeomechanics. — James G. Berryman; 128(8), 840-7 (2002).
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. — V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).

Porous materials
Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).
Extension of Poroelastic Analysis to Double-Porosity Materials: New Technique in Microgeomechanics. — James G. Berryman; 128(8), 840-7 (2002).
Homogenized Behavior Equations for Porous Bingham Viscoplastic Material. — Gilles Perrin; 128(8), 885-8 (2002).

Porous media
Torsional Surface Waves in an Initially Stressed Anisotropic Porous Medium. — S. Dey and M. G. Sarkar; 128(2), 184-9 (2002).
Coupling of Fluid Flow and Deformation in Underground Formations. — Marte S. Gutierrez and Roland W. Lewis; 128(7), 779-87 (2002).
Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. — V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).
Micromechanical Basis of Concept of Effective Stress. — Anjani Kumar Didwania; 128(8), 864-8 (2002).
Saturation Effects of Soils on Ground Motion at Free Surface Due to Incident SV Waves. — Jun Yang; 128(12), 1295-303 (2002).

Postbuckling
Thermomechanical Postbuckling of Cross-Ply Laminated Rectangular Plates. — K. K. Shukla and Y. Nath; 128(1), 93-101 (2002).
Postbuckling of Shear Deformable Laminated Cylindrical Shells. — Hui-Shen Shen; 128(3), 296-307 (2002).

Predictions
Prediction of Flow in Centrifugal Blower Using Quasi-Steady Rotor–Stator Models. — Siddharth Thakur, Wanlai Lin, and Jeffrey Wright; 128(10), 1039-49 (2002).

Predictive control
Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).

Pressure
Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).

Probability
Redundancy Index of Lifeline Systems. — Masaru Hoshiya and Kinya Yamamoto; 128(9), 961-8 (2002).
Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Probability distribution
Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).

Pseudodynamic method
Explicit Pseudodynamic Algorithm with Unconditional Stability. — Shuenn-Yih Chang; 128(9), 935-47 (2002).

Reconstruction
Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).

Reflection
Saturation Effects of Soils on Ground Motion at Free Surface Due to Incident SV Waves. — Jun Yang; 128(12), 1295-303 (2002).

Reinforcement
Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Reliability
Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).
Redundancy Index of Lifeline Systems. — Masaru Hoshiya and Kinya Yamamoto; 128(9), 961-8 (2002).

Response time
Bayesian Modal Updating using Complete Input and Incomplete Response Noisy Measurements. — Ka-Veng Yuen and Lambros S. Katafygiotis; 128(3), 340-50 (2002).

Rigidity
Homogenized Strategy toward Constitutive Identification of Masonry. — Antonella Cecchi and Robert Di Marco; 128(6), 688-97 (2002).

Rings
Non-Gaussian Model for Ringing Phenomena in Offshore Structures. — Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).
Collapse of Composite Rings Due to Delamination Buckling Under External Pressure. — Hayder A. Rasheed and John L. Tassoulas; 128(11), 1174-81 (2002).

Robust
Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Rock masses
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. — P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).
Displacement Accuracy of Discontinuous Deformation Analysis Method Applied to Sliding Block. — David M. Doolin and Nicholas Sitar; 128(11), 1158-68 (2002).

Rocks
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. — V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Rotation
Vertex Effect in Strain-Softening Concrete at Rotating Principal Axes. — Ferhun C. Caner, Zdeněk P. Bažant, and Jan Červenka; 128(1), 24-33 (2002).
Nonclassical Modes of Unrestrained Shear Beams. — Eduardo Kausel; 128(6), 663-7 (2002).
Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. — K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Roughness
Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).

Sampling design
Latin Hypercube Sampling for Stochastic Finite Element Analysis. — Anders M. J. Olsson and Göran E. Sandberg; 128(1), 121-5 (2002).

Sand
Effect of Gravity and Initial Stress on Torsional Surface Waves in Dry Sandy Medium. — S. Dey, Asit Kr. Gupta, and S. Gupta; 128(10), 1115-8 (2002).

Sand boils
Influence of Permeability on Liquefaction-Induced Shear Deformation. — Zhaohui Yang and Ahmed Elgamal; 128(7), 720-9 (2002).

Saturation
Micromechanics of Unsaturated Granular Media. — Xavier Chateau, Pascal Moucheront, and Olivier Pitois; 128(8), 856-63 (2002).
Micromechanical Basis of Concept of Effective Stress. — Anjani Kumar Didwania; 128(8), 864-8 (2002).

Scale effect
Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).

Sea water
Size Effect on Strength of Floating Sea Ice under Vertical Line Load. — Zdeněk P. Bažant and Zaoyang Guo; 128(3), 254-63 (2002).

Secondary flow
Turbulence Characteristics in Gradual Channel Transition. — Athanasios N. Papanicolaou and Robert Hilldale; 128(9), 948-60 (2002).

Sediment
Turbulence Characteristics in Gradual Channel Transition. — Athanasios N. Papanicolaou and Robert Hilldale; 128(9), 948-60 (2002).

Seepage
Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).

Seismic analysis
Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. — D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).

Seismic isolation
Stiffness Analysis of Fiber-Reinforced Rectangular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(4), 462-70 (2002).
Bending Stiffness of Fiber-Reinforced Circular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(11), 1150-7 (2002).

Seismic response
Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. — Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).
Stochastic Finite-Element Analysis of Seismic Soil–Structure Interaction. — Dan M. Ghiocel and Roger G. Ghanem; 128(1), 66-77 (2002).
Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. — Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Sensitivity analysis
Displacement Accuracy of Discontinuous Deformation Analysis Method Applied to Sliding Block. — David M. Doolin and Nicholas Sitar; 128(11), 1158-68 (2002).

Sensors
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. — Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Shape
Mode Shape Corrections for Wind Load Effects. — Yin Zhou, Ahsan Kareem, and Ming Gu; 128(1), 15-23 (2002).
Similarity Shapes of an Inclined, Partially Filled Membrane Container. — C. Y. Wang; 128(2), 249-51 (2002).

Shear deformation
Thermomechanical Postbuckling of Cross-Ply Laminated Rectangular Plates. — K. K. Shukla and Y. Nath; 128(1), 93-101 (2002).
Effective Hybrid/Mixed Finite Elements for Folded-Plate Structures. — M. Duan and Y. Miyamoto; 128(2), 202-8 (2002).
Postbuckling of Shear Deformable Laminated Cylindrical Shells. — Hui-Shen Shen; 128(3), 296-307 (2002).
Hygrothermal Effects on the Nonlinear Bending of Shear Deformable Laminated Plates. — Hui-Shen Shen; 128(4), 493-6 (2002).

Influence of Permeability on Liquefaction-Induced Shear Deformation. — Zhaohui Yang and Ahmed Elgamal; 128(7), 720-9 (2002).

Shell structures

Free Vibration Analysis and Design Aids of Stiffened Conoidal Shells. — A. N. Nayak and J. N. Bandyopadhyay; 128(4), 419-27 (2002).

Shells

Effective Hybrid/Mixed Finite Elements for Folded-Plate Structures. — M. Duan and Y. Miyamoto; 128(2), 202-8 (2002).

Numerical Analysis for the Nonlinear Free Vibration of Shallow Shells. — Anand V. Singh and Kang Lan; 128(12), 1259-66 (2002).

Shrinkage

Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. — E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).

Signal processing

Application of Wigner-Ville Transform to Evaluate Tensile Forces in Seven-Wire Prestressing Strands. — Hung-Liang (Roger) Chen and Komwut Wissawapaisal; 128(11), 1206-14 (2002).

Simulation

Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. — Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).

Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. — Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).

Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Edge Effects in Pressurized Membranes. — Tang-Tat Ng; 128(10), 1100-4 (2002).

Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. — Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Size effect

Size Effect on Strength of Floating Sea Ice under Vertical Line Load. — Zdeněk P. Bažant and Zaoyang Guo; 128(3), 254-63 (2002).

Slabs

Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. — E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).

Slip

Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. — Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).

Slope stability

Displacement Accuracy of Discontinuous Deformation Analysis Method Applied to Sliding Block. — David M. Doolin and Nicholas Sitar; 128(11), 1158-68 (2002).

Softening

Lateral Confinement Needed to Suppress Softening of Concrete in Compression. — Ferhun C. Caner and Zdeněk P. Bažant; 128(12), 1304-13 (2002).

Soil-structure interaction

Stochastic Finite-Element Analysis of Seismic Soil–Structure Interaction. — Dan M. Ghiocel and Roger G. Ghanem; 128(1), 66-77 (2002).

Time-Harmonic Analysis of Wave Propagation in Unbounded Layered Strata with Zigzag Boundaries. — Si-Hwan Park and John L. Tassoulas; 128(3), 359-68 (2002).

Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. — D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).

Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. — Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Soils

Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. — Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).

Solids

Requirements on Damage Functions. — S. Yazdani, Davis Cope, and Kevin Very; 128(1), 126-9 (2002).

A Boundary Element Analysis of Quasi-Brittle Solids Containing Cracks. — F. Qin, Z. Z. Cen, and T. C. Fung; 128(2), 240-8 (2002).

Coupled Waveform Analysis in Dynamic Characterization of Lossy Solids. — Bojan B. Guzina and Anjun Lu; 128(4), 392-402 (2002).

Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. — Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).

Effective Toughness of Damaged Solids Containing Ribbon Cracks. — Huang Hsing Pan; 128(7), 742-7 (2002).

Mechanics of Composite Solids. — Stephen Whitaker; 128(8), 823-8 (2002).

Space structures

Edge Effects in Pressurized Membranes. — Tang-Tat Ng; 128(10), 1100-4 (2002).

Spectral analysis

Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).

Stability

Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).

Stable Boundary Element Method/Finite Element Method Procedure for Dynamic Fluid–Structure Interactions. — G. Y. Yu, S. T. Lie, and S. C. Fan; 128(9), 909-15 (2002).

Explicit Pseudodynamic Algorithm with Unconditional Stability. — Shuenn-Yih Chang; 128(9), 935-47 (2002).

Stability and Delay Compensation for Real-Time Substructure Testing. — A. P. Darby, M. S. Williams, and A. Blakeborough; 128(12), 1276-84 (2002).

Thermoelastic Stability of Layer Bonded to Half Plane. — Derek T. Schade and Dale G. Karr; 128(12), 1285-94 (2002).

Stationary processes

Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. — Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).

Steel

Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. — S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).

Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. — Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).

Stiffeners

Free Vibration Analysis and Design Aids of Stiffened Conoidal Shells. — A. N. Nayak and J. N. Bandyopadhyay; 128(4), 419-27 (2002).

Stiffness

New Triangular Plane Element with Drilling Degrees of Freedom. — Petr Fajman; 128(4), 413-8 (2002).

Stiffness Analysis of Fiber-Reinforced Rectangular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(4), 462-70 (2002).

Three-Dimensional Model for Analysis of Stiffness and Hygroexpansion Properties of Fiber Composite Materials. — Kristian Stålne and Per-Johan Gustafsson; 128(6), 654-62 (2002).

Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. — Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Vibration Suppression with Resettable Device. — Faryar Jabbari and James E. Bobrow; 128(9), 916-24 (2002).

Explicit Pseudodynamic Algorithm with Unconditional Stability. — Shuenn-Yih Chang; 128(9), 935-47 (2002).

Bending Stiffness of Fiber-Reinforced Circular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(11), 1150-7 (2002).

Forced Vibrations of Single-Degree-of-Freedom Systems with Nonperiodically Time-Varying Parameters. — Q. S. Li; 128(12), 1267-75 (2002).

Stochastic processes

Stochastic Finite-Element Analysis of Seismic Soil–Structure Interaction. — Dan M. Ghiocel and Roger G. Ghanem; 128(1), 66-77 (2002).

Latin Hypercube Sampling for Stochastic Finite Element Analysis. — Anders M. J. Olsson and Göran E. Sandberg; 128(1), 121-5 (2002).

Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. — Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).

Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).

Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).

Strain

Graphical Relationship among Lamé Ellipsoid and Mohr's Circles. A Graphical View of Mohr's Circles. — Francisco J. Montáns; 128(3), 371-5 (2002).

Strain energy

Improved Damage Quantification from Elemental Modal Strain Energy Change. — Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).

Strength

Size Effect on Strength of Floating Sea Ice under Vertical Line Load. — Zdeněk P. Bažant and Zaoyang Guo; 128(3), 254-63 (2002).

Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. — Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).

Stress

Graphical Relationship among Lamé Ellipsoid and Mohr's Circles. A Graphical View of Mohr's Circles. — Francisco J. Montáns; 128(3), 371-5 (2002).

Effect of Gravity and Initial Stress on Torsional Surface Waves in Dry Sandy Medium. — S. Dey, Asit Kr. Gupta, and S. Gupta; 128(10), 1115-8 (2002).

Stress relaxation

Continuous Relaxation Spectrum for Concrete Creep and its Incorporation into Microplane Model M4. — Goangseup Zi and Zdeněk P. Bažant; 128(12), 1331-6 (2002).

Stress strain curves

Material Identification Procedure for Elastoplastic Drucker–Prager Model. — Juan José López Cela; 128(5), 586-91 (2002).

Structural analysis

Effective Hybrid/Mixed Finite Elements for Folded-Plate Structures. — M. Duan and Y. Miyamoto; 128(2), 202-8 (2002).

Formulation of Cracked Beam Element for Structural Analysis. — E. Viola, L. Nobile, and L. Federici; 128(2), 220-30 (2002).

Structural behavior

An Optical Approach to Structural Displacement Measurement and Its Application. — Gongkang Fu and Adil G. Moosa; 128(5), 511-20 (2002).

Structural control

Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).

Structural dynamics

Earthquake Response and Energy Evaluation of Inelastic Structures. — Kevin K. F. Wong and Rong Yang; 128(3), 308-17 (2002).

Structural models

Bayesian Modal Updating using Complete Input and Incomplete Response Noisy Measurements. — Ka-Veng Yuen and Lambros S. Katafygiotis; 128(3), 340-50 (2002).

Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Structural reliability

Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).

Structural stability

Postbuckling of Shear Deformable Laminated Cylindrical Shells. — Hui-Shen Shen; 128(3), 296-307 (2002).

Structure reinforcement

Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs. — Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 128(5), 552-61 (2002).

Structures

Improved Damage Quantification from Elemental Modal Strain Energy Change. — Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).

Substructures

Stability and Delay Compensation for Real-Time Substructure Testing. — A. P. Darby, M. S. Williams, and A. Blakeborough; 128(12), 1276-84 (2002).

Surface waves

Torsional Surface Waves in an Initially Stressed Anisotropic Porous Medium. — S. Dey and M. G. Sarkar; 128(2), 184-9 (2002).

Effect of Gravity and Initial Stress on Torsional Surface Waves in Dry Sandy Medium. — S. Dey, Asit Kr. Gupta, and S. Gupta; 128(10), 1115-8 (2002).

Surveys

Continuum Micromechanics: Survey. — André Zaoui; 128(8), 808-16 (2002).

Tailwater

Plane Turbulent Wall Jets in Shallow Tailwater. — S. A. Ead and N. Rajaratnam; 128(2), 143-55 (2002).

Temperature effects

Hygrothermal Effects on the Nonlinear Bending of Shear Deformable Laminated Plates. — Hui-Shen Shen; 128(4), 493-6 (2002).

Tennessee

Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. — Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).

Tension

Application of Wigner-Ville Transform to Evaluate Tensile Forces in Seven-Wire Prestressing Strands. — Hung-Liang (Roger) Chen and Komwut Wissawapaisal; 128(11), 1206-14 (2002).

Terrorism

Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).

Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". — Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).

Could the World Trade Center have been Modified to Prevent its Collapse? — David E. Newland and David Cebon; 128(7), 795-800 (2002).

Tests

Stability and Delay Compensation for Real-Time Substructure Testing. — A. P. Darby, M. S. Williams, and A. Blakeborough; 128(12), 1276-84 (2002).

Thermal diffusion

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).

Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Thermal factors

Thermomechanical Postbuckling of Cross-Ply Laminated Rectangular Plates. — K. K. Shukla and Y. Nath; 128(1), 93-101 (2002).

Thermodynamics

Requirements on Damage Functions. — S. Yazdani, Davis Cope, and Kevin Very; 128(1), 126-9 (2002).

Two-Phase Composite Model for High Performance Cementitious Composites. — Eugene Y. Chuang and Franz-Josef Ulm; 128(12), 1314-23 (2002).

Thermoelasticity

Thermoelastic Stability of Layer Bonded to Half Plane. — Derek T. Schade and Dale G. Karr; 128(12), 1285-94 (2002).

Three-dimensional analysis

Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. — Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).

Three-dimensional models

Three-Dimensional Model for Analysis of Stiffness and Hygroexpansion Properties of Fiber Composite Materials. — Kristian Stålne and Per-Johan Gustafsson; 128(6), 654-62 (2002).

Time factors

Time Domain Analysis on the Dynamic Response of a Flexible Floating Structure to Waves. — Xiaodong Liu and Shigeki Sakai; 128(1), 48-56 (2002).

Time-Domain Methods for Solving Problems of Linear Acoustics. — Andrzej J. Safjan; 128(10), 1050-61 (2002).

Forced Vibrations of Single-Degree-of-Freedom Systems with Nonperiodically Time-Varying Parameters. — Q. S. Li; 128(12), 1267-75 (2002).

Toughness

Effective Toughness of Damaged Solids Containing Ribbon Cracks. — Huang Hsing Pan; 128(7), 742-7 (2002).

Transient loads

Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. — D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).

Triangles

Reducing Dispersion of Linear Triangular Elements for the Helmholtz Equation. — Isaac Harari and Carnot L. Nogueira; 128(3), 351-8 (2002).

Triaxial compression

Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).

Triaxial stresses
Continuous Relaxation Spectrum for Concrete Creep and its Incorporation into Microplane Model M4. — Goangseup Zi and Zdeněk P. Bažant; 128(12), 1331-6 (2002).
Triaxial tests
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).
Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. — Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).
Tubes
Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. — S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).
Turbulence
Turbulence Characteristics in Gradual Channel Transition. — Athanasios N. Papanicolaou and Robert Hilldale; 128(9), 948-60 (2002).
Advances in Modeling of Aerodynamic Forces on Bridge Decks. — Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).
Turbulent flow
Plane Turbulent Wall Jets in Shallow Tailwater. — S. A. Ead and N. Rajaratnam; 128(2), 143-55 (2002).
Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).
Two phase flow
Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. — Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).
Unsteady flow
Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).
Vector analysis
Load Vectors for Damage Localization. — Dionisio Bernal; 128(1), 7-14 (2002).
Vehicles
Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).
Velocity
Torsional Surface Waves in an Initially Stressed Anisotropic Porous Medium. — S. Dey and M. G. Sarkar; 128(2), 184-9 (2002).
Turbulent Prandtl Number in Neutrally Buoyant Turbulent Round Jet. — Kuang-An Chang and Edwin A. Cowen; 128(10), 1082-7 (2002).
Vertical cylinders
Wave Diffraction by a Vertical Cylinder with a Porous Ring Plate. — Jianhua Wu and Allen T. Chwang; 128(2), 164-71 (2002).
Vertical loads
Size Effect on Strength of Floating Sea Ice under Vertical Line Load. — Zdeněk P. Bažant and Zaoyang Guo; 128(3), 254-63 (2002).
Vibration
Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).
Mathematical Model for Design of Mass Dampers for Wind Excited Structures. — Massimiliano Mattei and Francesco Ricciardelli; 128(9), 979-88 (2002).
Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. — K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).
Free Vibrations of Taut Cable with Attached Damper. I: Linear Viscous Damper. — J. A. Main and N. P. Jones; 128(10), 1062-71 (2002).
Free Vibrations of Taut Cable with Attached Damper. II: Nonlinear Damper. — J. A. Main and N. P. Jones; 128(10), 1072-81 (2002).
Numerical Analysis for the Nonlinear Free Vibration of Shallow Shells. — Anand V. Singh and Kang Lan; 128(12), 1259-66 (2002).
Forced Vibrations of Single-Degree-of-Freedom Systems with Nonperiodically Time-Varying Parameters. — Q. S. Li; 128(12), 1267-75 (2002).
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. — Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).
Vibration analysis
Free Vibration Analysis and Design Aids of Stiffened Conoidal Shells. — A. N. Nayak and J. N. Bandyopadhyay; 128(4), 419-27 (2002).
Vibration control
Vibration Suppression with Resettable Device. — Faryar Jabbari and James E. Bobrow; 128(9), 916-24 (2002).
Viscoelasticity
Dynamics of Nonviscously Damped Linear Systems. — S. Adhikari; 128(3), 328-39 (2002).
Coupled Waveform Analysis in Dynamic Characterization of Lossy Solids. — Bojan B. Guzina and Anjun Lu; 128(4), 392-402 (2002).
Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).
Viscoplasticity
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. — Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).
Voids
Homogenized Behavior Equations for Porous Bingham Viscoplastic Material. — Gilles Perrin; 128(8), 885-8 (2002).
Walls
Response of 1/4-Scale Concrete Masonry Unit (CMU) Walls to Blast. — Scott T. Dennis, James T. Baylot, and Stanley C. Woodson; 128(2), 134-42 (2002).
Water hammer
Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).
Water jets
Plane Turbulent Wall Jets in Shallow Tailwater. — S. A. Ead and N. Rajaratnam; 128(2), 143-55 (2002).
Water supply systems
Redundancy Index of Lifeline Systems. — Masaru Hoshiya and Kinya Yamamoto; 128(9), 961-8 (2002).
Wave diffraction
Wave Diffraction by a Vertical Cylinder with a Porous Ring Plate. — Jianhua Wu and Allen T. Chwang; 128(2), 164-71 (2002).
Wave propagation
Time-Harmonic Analysis of Wave Propagation in Unbounded Layered Strata with Zigzag Boundaries. — Si-Hwan Park and John L. Tassoulas; 128(3), 359-68 (2002).
Coupled Waveform Analysis in Dynamic Characterization of Lossy Solids. — Bojan B. Guzina and Anjun Lu; 128(4), 392-402 (2002).
Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).
Application of Wigner-Ville Transform to Evaluate Tensile Forces in Seven-Wire Prestressing Strands. — Hung-Liang (Roger) Chen and Komwut Wissawapaisal; 128(11), 1206-14 (2002).
Saturation Effects of Soils on Ground Motion at Free Surface Due to Incident SV Waves. — Jun Yang; 128(12), 1295-303 (2002).
Guided Lamb Wave Propagation in Composite Plate/Concrete Component. — Kritsakorn Luangvilai, Wonsiri Punurai, and Laurence J. Jacobs; 128(12), 1337-41 (2002).
Waves
Time Domain Analysis on the Dynamic Response of a Flexible Floating Structure to Waves. — Xiaodong Liu and Shigeki Sakai; 128(1), 48-56 (2002).
Wind
Mathematical Model for Design of Mass Dampers for Wind Excited Structures. — Massimiliano Mattei and Francesco Ricciardelli; 128(9), 979-88 (2002).
Wind analysis
Mode Shape Corrections for Wind Load Effects. — Yin Zhou, Ahsan Kareem, and Ming Gu; 128(1), 15-23 (2002).
Wind loads
Mode Shape Corrections for Wind Load Effects. — Yin Zhou, Ahsan Kareem, and Ming Gu; 128(1), 15-23 (2002).
Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).
Advances in Modeling of Aerodynamic Forces on Bridge Decks. — Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).
Observations on Low-Speed Aeroelasticity. — Robert H. Scanlan; 128(12), 1254-8 (2002).
Wind pressure
Damage Accumulation in Glass Plates. — Massimiliano Gioffrè and Vittorio Gusella; 128(7), 801-5 (2002).
Wood
Three-Dimensional Model for Analysis of Stiffness and Hygroexpansion Properties of Fiber Composite Materials. — Kristian Stålne and Per-Johan Gustafsson; 128(6), 654-62 (2002).

Author Index

Adam, Laurent
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. —Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. —Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Adhikari, S.
Dynamics of Nonviscously Damped Linear Systems. — S. Adhikari; 128(3), 328-39 (2002).

Adler, P. M.
Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).

Anam, Iftekhar
Effect of Nonlinear Wave Kinematics on Dynamic Response of Spars. —Iftekhar Anam and Jose M. Roesset; 128(9), 925-34 (2002).

Ansari, Farhad
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. —Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Arduino, Pedro
Closure to "Numerical Analysis of Geomaterials within Theory of Porous Media" by Pedro Arduino and Emir Jose Macari. —Pedro Arduino and Emir Jose Macari; 128(6), 708 (2002).

Aristizábal-Ochoa, J. Darío
Classic Buckling of Three-Dimensional Multicolumn Systems under Gravity Loads. —J. Darío Aristizábal-Ochoa; 128(6), 613-24 (2002).

Arslan, A.
Improved Lattice Model for Concrete Fracture. —A. Arslan, R. Ince, and B. L. Karihaloo; 128(1), 57-65 (2002).

Assimaki, Dominic
Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. —Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).

Au, Siu-Kui
Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Auriault, J.-L.
Upscaling Heterogeneous Media by Asymptotic Expansions. — J.-L. Auriault; 128(8), 817-22 (2002).

Aval, S. B. B.
Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. —S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).

Aznárez, Juan J.
Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. — Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Baillon, Lucie
Experiments to Relate Acoustic Emission Energy to Fracture Energy of Concrete. — Eric N. Landis and Lucie Baillon; 128(6), 698-702 (2002).

Bandyopadhyay, J. N.
Free Vibration Analysis and Design Aids of Stiffened Conoidal Shells. — A. N. Nayak and J. N. Bandyopadhyay; 128(4), 419-27 (2002).

Baylot, James T.
Response of 1/4-Scale Concrete Masonry Unit (CMU) Walls to Blast. — Scott T. Dennis, James T. Baylot, and Stanley C. Woodson; 128(2), 134-42 (2002).

Bažant, Zdeněk P.
Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou: 128(1), 2-6 (2002).
Vertex Effect in Strain-Softening Concrete at Rotating Principal Axes. —Ferhun C. Caner, Zdeněk P. Bažant, and Jan Červenka; 128(1), 24-33 (2002).
Size Effect on Strength of Floating Sea Ice under Vertical Line Load. —Zdeněk P. Bažant and Zaoyang Guo; 128(3), 254-63 (2002).
Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". —Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).
Nonlocal Integral Formulations of Plasticity and Damage: Survey of Progress. —Zdeněk P. Bažant and Milan Jirásek; 128(11), 1119-49 (2002).
Lateral Confinement Needed to Suppress Softening of Concrete in Compression. —Ferhun C. Caner and Zdeněk P. Bažant; 128(12), 1304-13 (2002).
Continuous Relaxation Spectrum for Concrete Creep and its Incorporation into Microplane Model M4. —Goangseup Zi and Zdeněk P. Bažant; 128(12), 1331-6 (2002).

Beck, James L.
Bayesian Updating of Structural Models and Reliability using Markov Chain Monte Carlo Simulation. — James L. Beck and Siu-Kui Au; 128(4), 380-91 (2002).

Bekri, S.
Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).

Bernal, Dionisio
Load Vectors for Damage Localization. —Dionisio Bernal; 128(1), 7-14 (2002).

Berryman, James G.
Extension of Poroelastic Analysis to Double-Porosity Materials: New Technique in Microgeomechanics. — James G. Berryman; 128(8), 840-7 (2002).

Blakeborough, A.
Stability and Delay Compensation for Real-Time Substructure Testing. — A. P. Darby, M. S. Williams, and A. Blakeborough; 128(12), 1276-84 (2002).

Bobrow, James E.
Vibration Suppression with Resettable Device. — Faryar Jabbari and James E. Bobrow; 128(9), 916-24 (2002).

Bradford, M. A.
In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).

Bray, Jonathan D.
Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. — Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Breitung, K.
Discussion of "New Approximations for SORM: Parts 1 and 2" by Yan-Gang Zhao and Tetsuro Ono. — K. Breitung; 128(1), 130-1 (2002).

Caner, Ferhun C.
Vertex Effect in Strain-Softening Concrete at Rotating Principal Axes. —Ferhun C. Caner, Zdeněk P. Bažant, and Jan Červenka; 128(1), 24-33 (2002).
Lateral Confinement Needed to Suppress Softening of Concrete in Compression. —Ferhun C. Caner and Zdeněk P. Bažant; 128(12), 1304-13 (2002).

Carol, Ignacio
Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).

Cebon, David
Could the World Trade Center have been Modified to Prevent its Collapse? —David E. Newland and David Cebon; 128(7), 795-800 (2002).

Cecchi, Antonella
Homogenized Strategy toward Constitutive Identification of Masonry. —Antonella Cecchi and Robert Di Marco; 128(6), 688-97 (2002).

Cen, Z. Z.
A Boundary Element Analysis of Quasi-Brittle Solids Containing Cracks. —F. Qin, Z. Z. Cen, and T. C. Fung; 128(2), 240-8 (2002).

Červenka, Jan
Vertex Effect in Strain-Softening Concrete at Rotating Principal Axes. —Ferhun C. Caner, Zdeněk P. Bažant, and Jan Červenka; 128(1), 24-33 (2002).

Chang, Kuang-An
Turbulent Prandtl Number in Neutrally Buoyant Turbulent Round Jet. —Kuang-An Chang and Edwin A. Cowen; 128(10), 1082-7 (2002).

Chang, Shuenn-Yih
Explicit Pseudodynamic Algorithm with Unconditional Stability. — Shuenn-Yih Chang; 128(9), 935-47 (2002).

Chateau, Xavier
Micromechanics of Unsaturated Granular Media. — Xavier Chateau, Pascal Moucheront, and Olivier Pitois; 128(8), 856-63 (2002).

Chau, K. T.
Analytic Solution for Finite Transversely Isotropic Circular Cylinders under the Axial Point Load Test. — X. X. Wei and K. T. Chau; 128(2), 209-19 (2002).

Chen, Ching-Jen
Some Historical and Future Aspects of Engineering Mechanics. — Ching-Jen Chen and Yousef Haik; 128(12), 1242-53 (2002).

Chen, Hung-Liang (Roger)
Application of Wigner-Ville Transform to Evaluate Tensile Forces in Seven-Wire Prestressing Strands. — Hung-Liang (Roger) Chen and Komwut Wissawapaisal; 128(11), 1206-14 (2002).

Chen, Xingwei
Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. —Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).

Chen, Xinzhong
Advances in Modeling of Aerodynamic Forces on Bridge Decks. —Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).

Chiew, Yee-Meng
Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. —Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).

Chuang, Eugene Y.
Two-Phase Composite Model for High Performance Cementitious Composites. —Eugene Y. Chuang and Franz-Josef Ulm; 128(12), 1314-23 (2002).

Chwang, Allen T.
Wave Diffraction by a Vertical Cylinder with a Porous Ring Plate. —Jianhua Wu and Allen T. Chwang; 128(2), 164-71 (2002).

Cope, Davis
Requirements on Damage Functions. —S. Yazdani, Davis Cope, and Kevin Very; 128(1), 126-9 (2002).

Cowen, Edwin A.
Turbulent Prandtl Number in Neutrally Buoyant Turbulent Round Jet. —Kuang-An Chang and Edwin A. Cowen; 128(10), 1082-7 (2002).

Darby, A. P.
Stability and Delay Compensation for Real-Time Substructure Testing. —A. P. Darby, M. S. Williams, and A. Blakeborough; 128(12), 1276-84 (2002).

de Buhan, P.
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. —P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

De Flaviis, Franco
Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

Dennis, Scott T.
Response of 1/4-Scale Concrete Masonry Unit (CMU) Walls to Blast. — Scott T. Dennis, James T. Baylot, and Stanley C. Woodson; 128(2), 134-42 (2002).

Der Kiureghian, Armen
Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

De Roeck, Guido
Discussion of "Structural Damage Detection from Modal Strain Energy Change" by Z. Y. Shi, S. S. Law, and L. M. Zhang. — Wei-Xin Ren and Guido De Roeck; 128(3), 376-7 (2002).

Deudé, V.
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. — V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).

Dey, S.
Torsional Surface Waves in an Initially Stressed Anisotropic Porous Medium. —S. Dey and M. G. Sarkar; 128(2), 184-9 (2002).
Effect of Gravity and Initial Stress on Torsional Surface Waves in Dry Sandy Medium. —S. Dey, Asit Kr. Gupta, and S. Gupta; 128(10), 1115-8 (2002).

Didwania, Anjani Kumar
Micromechanical Basis of Concept of Effective Stress. — Anjani Kumar Didwania; 128(8), 864-8 (2002).

Di Marco, Robert
Homogenized Strategy toward Constitutive Identification of Masonry. —Antonella Cecchi and Robert Di Marco; 128(6), 688-97 (2002).

Domínguez, José
Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. —Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Doolin, David M.
Displacement Accuracy of Discontinuous Deformation Analysis Method Applied to Sliding Block. — David M. Doolin and Nicholas Sitar; 128(11), 1158-68 (2002).

Dormieux, L.
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. —V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. —V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Dormieux, Luc
Below Macro: Driving Forces of Micromechanics. —Luc Dormieux and Franz-Josef Ulm; 128(8), 807 (2002).
Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. —Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).

Duan, M.
Effective Hybrid/Mixed Finite Elements for Folded-Plate Structures. — M. Duan and Y. Miyamoto; 128(2), 202-8 (2002).

Ead, S. A.
Plane Turbulent Wall Jets in Shallow Tailwater. — S. A. Ead and N. Rajaratnam; 128(2), 143-55 (2002).

Elgamal, Ahmed
Influence of Permeability on Liquefaction-Induced Shear Deformation. — Zhaohui Yang and Ahmed Elgamal; 128(7), 720-9 (2002).

Etse, Guillermo
Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).

Fajman, Petr
New Triangular Plane Element with Drilling Degrees of Freedom. — Petr Fajman; 128(4), 413-8 (2002).

Fallahi, Behrooz
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. —Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).

Fan, S. C.
Stable Boundary Element Method/Finite Element Method Procedure for Dynamic Fluid–Structure Interactions. —G. Y. Yu, S. T. Lie, and S. C. Fan; 128(9), 909-15 (2002).

Federici, L.
Formulation of Cracked Beam Element for Structural Analysis. —E. Viola, L. Nobile, and L. Federici; 128(2), 220-30 (2002).

Feng, Maria Q.
Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

Fréard, J.
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. —P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Fu, Gongkang
An Optical Approach to Structural Displacement Measurement and Its Application. —Gongkang Fu and Adil G. Moosa; 128(5), 511-20 (2002).

Fujii, Fumio
Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. —Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).

Fujino, Yozo
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. —Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. —Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).

Fung, T. C.
A Boundary Element Analysis of Quasi-Brittle Solids Containing Cracks. —F. Qin, Z. Z. Cen, and T. C. Fung; 128(2), 240-8 (2002).

Gardoni, Paolo
Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. — Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Garnier, D.
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. — P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Gettu, Ravindra
Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).

Ghanem, Roger
Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. — Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).

Ghanem, Roger G.
Stochastic Finite-Element Analysis of Seismic Soil–Structure Interaction. —Dan M. Ghiocel and Roger G. Ghanem; 128(1), 66-77 (2002).

Ghiocel, Dan M.
Stochastic Finite-Element Analysis of Seismic Soil–Structure Interaction. —Dan M. Ghiocel and Roger G. Ghanem; 128(1), 66-77 (2002).

Gioffrè, Massimiliano
Damage Accumulation in Glass Plates. —Massimiliano Gioffrè and Vittorio Gusella; 128(7), 801-5 (2002).

Gobat, Jason I.
Generalized-α Time Integration Solutions for Hanging Chain Dynamics. —Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).

Golafshani, A. A.
Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. —S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).

Grigoriu, Mircea
Non-Gaussian Model for Ringing Phenomena in Offshore Structures. —Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).

Grosenbaugh, Mark A.
Generalized-α Time Integration Solutions for Hanging Chain Dynamics. —Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).

Gu, Ming
Mode Shape Corrections for Wind Load Effects. —Yin Zhou, Ahsan Kareem, and Ming Gu; 128(1), 15-23 (2002).

Guo, Ya-Jun
Solution Method for Beams on Nonuniform Elastic Foundations. —Ya-Jun Guo and Y. Jack Weitsman; 128(5), 592-4 (2002).

Guo, Zaoyang
Size Effect on Strength of Floating Sea Ice under Vertical Line Load. —Zdeněk P. Bažant and Zaoyang Guo; 128(3), 254-63 (2002).

Guoping, Cai
Optimal Control Method for Seismically Excited Building Structures with Time-delay in Control. — Cai Guoping and Huang Jinzhi; 128(6), 602-12 (2002).

Gupta, Asit Kr.
Effect of Gravity and Initial Stress on Torsional Surface Waves in Dry Sandy Medium. — S. Dey, Asit Kr. Gupta, and S. Gupta; 128(10), 1115-8 (2002).

Gupta, S.
Effect of Gravity and Initial Stress on Torsional Surface Waves in Dry Sandy Medium. — S. Dey, Asit Kr. Gupta, and S. Gupta; 128(10), 1115-8 (2002).

Gurley, Kurtis
Non-Gaussian Model for Ringing Phenomena in Offshore Structures. — Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).

Gusella, Vittorio
Damage Accumulation in Glass Plates. — Massimiliano Gioffrè and Vittorio Gusella; 128(7), 801-5 (2002).

Gustafsson, Per-Johan
Three-Dimensional Model for Analysis of Stiffness and Hygroexpansion Properties of Fiber Composite Materials. —Kristian Stålne and Per-Johan Gustafsson; 128(6), 654-62 (2002).

Gutierrez, Marte S.
Coupling of Fluid Flow and Deformation in Underground Formations. —Marte S. Gutierrez and Roland W. Lewis; 128(7), 779-87 (2002).

Guzina, Bojan B.
Coupled Waveform Analysis in Dynamic Characterization of Lossy Solids. —Bojan B. Guzina and Anjun Lu; 128(4), 392-402 (2002).
Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).

Haik, Yousef
Some Historical and Future Aspects of Engineering Mechanics. —Ching-Jen Chen and Yousef Haik; 128(12), 1242-53 (2002).

Harari, Isaac
Reducing Dispersion of Linear Triangular Elements for the Helmholtz Equation. —Isaac Harari and Carnot L. Nogueira; 128(3), 351-8 (2002).

Hellmich, Christian
Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. —Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).

Hilldale, Robert
Turbulence Characteristics in Gradual Channel Transition. — Athanasios N. Papanicolaou and Robert Hilldale; 128(9), 948-60 (2002).

Hjelmstad, K. D.
Simple Nonlinear Model for Elastic Response of Cohesionless Granular Materials. —E. Taciroglu and K. D. Hjelmstad; 128(9), 969-78 (2002).

Hörmann, Matthias
Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs. —Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 128(5), 552-61 (2002).

Hoshiya, Masaru
Redundancy Index of Lifeline Systems. — Masaru Hoshiya and Kinya Yamamoto; 128(9), 961-8 (2002).

Hsu, C. T.
Semianalytical Model for Solid Concentration in Turbulent Pipe Flows with Dispersed Particles. — Xingwei Chen, C. T. Hsu, and Yee-Meng Chiew; 128(4), 487-92 (2002).

Hu, Sau-Lon James
Tuned Mass Damper Design for Optimally Minimizing Fatigue Damage. — Hua-Jun Li and Sau-Lon James Hu; 128(6), 703-7 (2002).

Huang, M.-H.
Dynamic Response of Plates on Elastic Foundation to Moving Loads. — M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).

Ince, R.
Improved Lattice Model for Concrete Fracture. — A. Arslan, R. Ince, and B. L. Karihaloo; 128(1), 57-65 (2002).

Iwan, Wilfred D.
Protecting Base-Isolated Structures from Near-Field Ground Motion by Tuned Interaction Damper. — Yunfeng Zhang and Wilfred D. Iwan; 128(3), 287-95 (2002).

Jabbari, F.
Actuator Saturation and Control Design for Buildings under Seismic Excitation. —Jin-Hoon Kim and F. Jabbari; 128(4), 403-12 (2002).

Jabbari, Faryar
Vibration Suppression with Resettable Device. —Faryar Jabbari and James E. Bobrow; 128(9), 916-24 (2002).

Jacobs, Laurence J.
Guided Lamb Wave Propagation in Composite Plate/Concrete Component. —Kritsakorn Luangvilai, Wonsiri Punurai, and Laurence J. Jacobs; 128(12), 1337-41 (2002).

Jalili, Nader
Design and Dynamic Analysis of an Adjustable Inertia Absorber for Semiactive Structural Vibration Attenuation. —Nader Jalili and Behrooz Fallahi; 128(12), 1342-8 (2002).

Jefferson, A. D.
Tripartite Cohesive Crack Model. —A. D. Jefferson; 128(6), 644-53 (2002).

Jinzhi, Huang
Optimal Control Method for Seismically Excited Building Structures with Time-delay in Control. —Cai Guoping and Huang Jinzhi; 128(6), 602-12 (2002).

Jirásek, Milan
Nonlocal Integral Formulations of Plasticity and Damage: Survey of Progress. —Zdeněk P. Bažant and Milan Jirásek; 128(11), 1119-49 (2002).

Johnson, E. A.
"Smart" Base Isolation Systems. —J. C. Ramallo, E. A. Johnson, and B. F. Spencer, Jr.; 128(10), 1088-99 (2002).

Jones, N. P.
Free Vibrations of Taut Cable with Attached Damper. I: Linear Viscous Damper. —J. A. Main and N. P. Jones; 128(10), 1062-71 (2002).
Free Vibrations of Taut Cable with Attached Damper. II: Nonlinear Damper. —J. A. Main and N. P. Jones; 128(10), 1072-81 (2002).

Jones, Nicholas P.
A Tribute to Robert Harris Scanlan. — Nicholas P. Jones; 128(12), 1239-41 (2002).

Kaliakin, Victor N.
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).

Kantor, Jeffrey C.
Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).

Kareem, Ahsan
Mode Shape Corrections for Wind Load Effects. — Yin Zhou, Ahsan Kareem, and Ming Gu; 128(1), 15-23 (2002).
Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. — Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).
Non-Gaussian Model for Ringing Phenomena in Offshore Structures. —Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).
Advances in Modeling of Aerodynamic Forces on Bridge Decks. —Xinzhong Chen and Ahsan Kareem; 128(11), 1193-205 (2002).

Karihaloo, B. L.
Improved Lattice Model for Concrete Fracture. —A. Arslan, R. Ince, and B. L. Karihaloo; 128(1), 57-65 (2002).

Karr, Dale G.
Thermoelastic Stability of Layer Bonded to Half Plane. — Derek T. Schade and Dale G. Karr; 128(12), 1285-94 (2002).

Karstunen, Minna
Discussion of "Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. I: Theory" by George Z. Voyiadjis and Chung R. Song. —Minna Karstunen and Simon J. Wheeler; 128(4), 497-8 (2002).
Discussion of "Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. II: Application to Piezocone Test" by George Z. Voyiadjis and Chung R. Song. —Simon J. Wheeler and Minna Karstunen; 128(5), 599-600 (2002).

Katafygiotis, Lambros S.
Bayesian Modal Updating using Complete Input and Incomplete Response Noisy Measurements. —Ka-Veng Yuen and Lambros S. Katafygiotis; 128(3), 340-50 (2002).

Katsikadelis, J. T.
Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. —E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).

Kausel, Eduardo
Seismic Simulation of Inelastic Soils via Frequency-Dependent Moduli and Damping. —Eduardo Kausel and Dominic Assimaki; 128(1), 34-47 (2002).
Nonclassical Modes of Unrestrained Shear Beams. —Eduardo Kausel; 128(6), 663-7 (2002).

Kelly, James M.
Stiffness Analysis of Fiber-Reinforced Rectangular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(4), 462-70 (2002).
Bending Stiffness of Fiber-Reinforced Circular Seismic Isolators. — Hsiang-Chuan Tsai and James M. Kelly; 128(11), 1150-7 (2002).

Kennedy, Thomas W.
Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).

Kim, Jin-Hoon
Actuator Saturation and Control Design for Buildings under Seismic Excitation. — Jin-Hoon Kim and F. Jabbari; 128(4), 403-12 (2002).

Kim, Yoo Jin
Use of Microwaves for Damage Detection of Fiber Reinforced Polymer-Wrapped Concrete Structures. — Maria Q. Feng, Franco De Flaviis, and Yoo Jin Kim; 128(2), 172-83 (2002).

Kimura, Koichi
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. — Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).

Kondo, D.
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. —V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. —V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Kyriakides, Stelios
Efficiency Limits for Slip-on Type Buckle Arrestors for Offshore Pipelines. —Stelios Kyriakides; 128(1), 102-11 (2002).

Lam, King-wah Frank
Flow Establishment in Elastic Pipes. —King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).

Lan, Kang
Numerical Analysis for the Nonlinear Free Vibration of Shallow Shells. —Anand V. Singh and Kang Lan; 128(12), 1259-66 (2002).

Landis, Eric N.
Experiments to Relate Acoustic Emission Energy to Fracture Energy of Concrete. —Eric N. Landis and Lucie Baillon; 128(6), 698-702 (2002).

Law, S. S.
Closure to "Structural Damage Detection from Modal Strain Energy Change" by Z. Y. Shi, S. S. Law, and L. M. Zhang. —Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(3), 377-8 (2002).
Improved Damage Quantification from Elemental Modal Strain Energy Change. —Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).
Moving Loads Identification Through Regularization. — X. Q. Zhu and S. S. Law; 128(9), 989-1000 (2002).

Lee, George C.
Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. —Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).

Lemarchand, Eric
Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. —Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).

Leutheusser, Hans J.
Flow Establishment in Elastic Pipes. — King-wah Frank Lam and Hans J. Leutheusser; 128(11), 1169-73 (2002).

Lewis, Roland W.
Coupling of Fluid Flow and Deformation in Underground Formations. — Marte S. Gutierrez and Roland W. Lewis; 128(7), 779-87 (2002).

Li, Guang
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. — Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Li, Hua-Jun
Tuned Mass Damper Design for Optimally Minimizing Fatigue Damage. — Hua-Jun Li and Sau-Lon James Hu; 128(6), 703-7 (2002).

Li, Q. M.
Pressure-Impulse Diagram for Blast Loads Based on Dimensional Analysis and Single-Degree-of-Freedom Model. — Q. M. Li and H. Meng; 128(1), 87-92 (2002).

Li, Q. S.
Forced Vibrations of Single-Degree-of-Freedom Systems with Nonperiodically Time-Varying Parameters. — Q. S. Li; 128(12), 1267-75 (2002).

Li, Qingbin
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. —Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Lie, S. T.
Stable Boundary Element Method/Finite Element Method Procedure for Dynamic Fluid–Structure Interactions. —G. Y. Yu, S. T. Lie, and S. C. Fan; 128(9), 909-15 (2002).

Liew, K. M.
Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. —K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Lin, Wanlai
Prediction of Flow in Centrifugal Blower Using Quasi-Steady Rotor–Stator Models. —Siddharth Thakur, Wanlai Lin, and Jeffrey Wright; 128(10), 1039-49 (2002).

Ling, Hoe I.
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. —Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).

Liu, Qingren
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. —Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Liu, Xiaodong
Time Domain Analysis on the Dynamic Response of a Flexible Floating Structure to Waves. —Xiaodong Liu and Shigeki Sakai; 128(1), 48-56 (2002).

Liu, Zhongyu
Unified Catastrophic Model for Collapsible Loess. —Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).

López Cela, Juan José
Material Identification Procedure for Elastoplastic Drucker–Prager Model. — Juan José López Cela; 128(5), 586-91 (2002).

Loya, K. G.
Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. — D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).

Lu, Anjun
Coupled Waveform Analysis in Dynamic Characterization of Lossy Solids. — Bojan B. Guzina and Anjun Lu; 128(4), 392-402 (2002).

Luangvilai, Kritsakorn
Guided Lamb Wave Propagation in Composite Plate/Concrete Component. — Kritsakorn Luangvilai, Wonsiri Punurai, and Laurence J. Jacobs; 128(12), 1337-41 (2002).

Macari, Emir Jose
Closure to "Numerical Analysis of Geomaterials within Theory of Porous Media" by Pedro Arduino and Emir Jose Macari. — Pedro Arduino and Emir Jose Macari; 128(6), 708 (2002).

Maeso, Orlando
Effects of Space Distribution of Excitation on Seismic Response of Arch Dams. —Orlando Maeso, Juan J. Aznárez, and José Domínguez; 128(7), 759-68 (2002).

Maghous, S.
Micromechanical Approach to Nonlinear Poroelasticity: Application to Cracked Rocks. —V. Deudé, L. Dormieux, D. Kondo, and S. Maghous; 128(8), 848-55 (2002).
Failure Properties of Fractured Rock Masses as Anisotropic Homogenized Media. —P. de Buhan, J. Fréard, D. Garnier, and S. Maghous; 128(8), 869-75 (2002).

Main, J. A.
Free Vibrations of Taut Cable with Attached Damper. I: Linear Viscous Damper. —J. A. Main and N. P. Jones; 128(10), 1062-71 (2002).
Free Vibrations of Taut Cable with Attached Damper. II: Nonlinear Damper. —J. A. Main and N. P. Jones; 128(10), 1072-81 (2002).

Masad, Eyad
Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. —Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Mattei, Massimiliano
Mathematical Model for Design of Mass Dampers for Wind Excited Structures. —Massimiliano Mattei and Francesco Ricciardelli; 128(9), 979-88 (2002).

Mei, Gang
Model Predictive Control of Structures under Earthquakes using Acceleration Feedback. —Gang Mei, Ahsan Kareem, and Jeffrey C. Kantor; 128(5), 574-85 (2002).

Meng, H.
Pressure-Impulse Diagram for Blast Loads Based on Dimensional Analysis and Single-Degree-of-Freedom Model. —Q. M. Li and H. Meng; 128(1), 87-92 (2002).

Menrath, Horst
Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs. — Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 128(5), 552-61 (2002).

Miao, Tiande
Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).

Miyamoto, Y.
Effective Hybrid/Mixed Finite Elements for Folded-Plate Structures. — M. Duan and Y. Miyamoto; 128(2), 202-8 (2002).

Mohareb, Magdi
Plastic Interaction Relations for Pipe Sections. — Magdi Mohareb; 128(1), 112-20 (2002).

Montáns, Francisco J.
Graphical Relationship among Lamé Ellipsoid and Mohr's Circles. A Graphical View of Mohr's Circles. — Francisco J. Montáns; 128(3), 371-5 (2002).

Moosa, Adil G.
An Optical Approach to Structural Displacement Measurement and Its Application. — Gongkang Fu and Adil G. Moosa; 128(5), 511-20 (2002).

Mosalam, Khalid M.
Probabilistic Capacity Models and Fragility Estimates for Reinforced Concrete Columns based on Experimental Observations. —Paolo Gardoni, Armen Der Kiureghian, and Khalid M. Mosalam; 128(10), 1024-38 (2002).

Moucheront, Pascal
Micromechanics of Unsaturated Granular Media. —Xavier Chateau, Pascal Moucheront, and Olivier Pitois; 128(8), 856-63 (2002).

Nath, Y.
Thermomechanical Postbuckling of Cross-Ply Laminated Rectangular Plates. —K. K. Shukla and Y. Nath; 128(1), 93-101 (2002).

Nayak, A. N.
Free Vibration Analysis and Design Aids of Stiffened Conoidal Shells. —A. N. Nayak and J. N. Bandyopadhyay; 128(4), 419-27 (2002).

Nelson, Carl A.
Errata for "Explicit Kinematic Solution for Tall Rigid-Jointed Frames" by Carl A. Nelson. —Carl A. Nelson; 128(4), 499 (2002).

Newland, David E.
Could the World Trade Center have been Modified to Prevent its Collapse? —David E. Newland and David Cebon; 128(7), 795-800 (2002).

Ng, T. Y.
Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. —K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Ng, Tang-Tat
Edge Effects in Pressurized Membranes. —Tang-Tat Ng; 128(10), 1100-4 (2002).

Niu, Hedong
Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. —Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Niu, Yonghong
Unified Catastrophic Model for Collapsible Loess. — Tiande Miao, Zhongyu Liu, and Yonghong Niu; 128(5), 595-8 (2002).

Nobile, L.
Formulation of Cracked Beam Element for Structural Analysis. — E. Viola, L. Nobile, and L. Federici; 128(2), 220-30 (2002).

Noguchi, Hirohisa
Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. — Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).

Nogueira, Carnot L.
Reducing Dispersion of Linear Triangular Elements for the Helmholtz Equation. — Isaac Harari and Carnot L. Nogueira; 128(3), 351-8 (2002).

Ohtori, Yasuki
Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).

Okamoto, Masaaki
Vibration of Pressure Loaded Nonlinear Rectangular Plates with Cross Stiffener. —Koichi Kimura and Masaaki Okamoto; 128(7), 788-94 (2002).

Okazawa, Shigenobu
Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. —Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).

Olsson, Anders M. J.
Latin Hypercube Sampling for Stochastic Finite Element Analysis. —Anders M. J. Olsson and Göran E. Sandberg; 128(1), 121-5 (2002).

Omenzetter, Piotr
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. —Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. —Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).

Ono, Tetsuro
Closure to "New Approximation for SORM: Parts 1 and 2" by Yan-Gang Zhao and Tetsuro Ono. —Yan-Gang Zhao and Tetsuro Ono; 128(1), 131-2 (2002).

O'Sullivan, Catherine
Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. —Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Pak, Ronald Y. S.
Three-Dimensional Green's Functions for a Multilayered Half-Space in Displacement Potentials. — Ronald Y. S. Pak and Bojan B. Guzina; 128(4), 449-61 (2002).

Pan, Huang Hsing
Effective Toughness of Damaged Solids Containing Ribbon Cracks. —Huang Hsing Pan; 128(7), 742-7 (2002).

Papanicolaou, Athanasios N.
Turbulence Characteristics in Gradual Channel Transition. — Athanasios N. Papanicolaou and Robert Hilldale; 128(9), 948-60 (2002).

Park, Si-Hwan
Time-Harmonic Analysis of Wave Propagation in Unbounded Layered Strata with Zigzag Boundaries. — Si-Hwan Park and John L. Tassoulas; 128(3), 359-68 (2002).

Pensée, V.
Micromechanical Analysis of Anisotropic Damage in Brittle Materials. — V. Pensée, D. Kondo, and L. Dormieux; 128(8), 889-97 (2002).

Perrin, Gilles
Homogenized Behavior Equations for Porous Bingham Viscoplastic Material. — Gilles Perrin; 128(8), 885-8 (2002).

Pervaiz, Shariq
Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. — Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).

Pi, Y.-L.
In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).

Pietruszczak, S.
Failure Criterion for Structural Masonry based on Critical Plane Approach. —R. Ushaksaraei and S. Pietruszczak; 128(7), 769-78 (2002).

Piltner, Reinhard
Discussion of "Development of Four-Node Membrane Element Containing Central Circular Hole" by A. K. Soh and Z. F. Long. —Reinhard Piltner; 128(12), 1349 (2002).

Pitois, Olivier
Micromechanics of Unsaturated Granular Media. —Xavier Chateau, Pascal Moucheront, and Olivier Pitois; 128(8), 856-63 (2002).

Ponthot, Jean-Philippe
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part I: Theory. —Laurent Adam and Jean-Philippe Ponthot; 128(11), 1215-21 (2002).
Numerical Simulation of Viscoplastic and Frictional Heating During Finite Deformation of Metal. Part II: Applications. —Laurent Adam and Jean-Philippe Ponthot; 128(11), 1222-32 (2002).

Popovics, John S.
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. —Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).

Punurai, Wonsiri
Guided Lamb Wave Propagation in Composite Plate/Concrete Component. —Kritsakorn Luangvilai, Wonsiri Punurai, and Laurence J. Jacobs; 128(12), 1337-41 (2002).

Qi, Jincheng
Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. —Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).

Qiao, Pizhong
Higher-Order Finite Strip Method for Postbuckling Analysis of Imperfect Composite Plates. — Guiping Zou and Pizhong Qiao; 128(9), 1008-15 (2002).
Local Buckling of Elastically Restrained Fiber-Reinforced Plastic Plates and its Application to Box Sections. — Pizhong Qiao and Guiping Zou; 128(12), 1324-30 (2002).

Qin, F.
A Boundary Element Analysis of Quasi-Brittle Solids Containing Cracks. — F. Qin, Z. Z. Cen, and T. C. Fung; 128(2), 240-8 (2002).

Rai, Durgesh C.
Inelastic Cyclic Buckling of Aluminum Shear Panels. — Durgesh C. Rai; 128(11), 1233-7 (2002).

Rajaratnam, N.
Plane Turbulent Wall Jets in Shallow Tailwater. — S. A. Ead and N. Rajaratnam; 128(2), 143-55 (2002).

Ramallo, J. C.
"Smart" Base Isolation Strategies Employing Magnetorheological Dampers. — H. Yoshioka, J. C. Ramallo, and B. F. Spencer, Jr.; 128(5), 540-51 (2002).
"Smart" Base Isolation Systems. — J. C. Ramallo, E. A. Johnson, and B. F. Spencer, Jr.; 128(10), 1088-99 (2002).

Ramm, Ekkehard
Numerical Investigation of Fiber Reinforced Polymers Poststrengthened Concrete Slabs. —Matthias Hörmann, Horst Menrath, and Ekkehard Ramm; 128(5), 552-61 (2002).

Rasheed, Hayder A.
Bond Slip Analysis of Fiber-Reinforced Polymer-Strengthened Beams. —Hayder A. Rasheed and Shariq Pervaiz; 128(1), 78-86 (2002).
Collapse of Composite Rings Due to Delamination Buckling Under External Pressure. —Hayder A. Rasheed and John L. Tassoulas; 128(11), 1174-81 (2002).

Ren, Wei-Xin
Discussion of "Structural Damage Detection from Modal Strain Energy Change" by Z. Y. Shi, S. S. Law, and L. M. Zhang. —Wei-Xin Ren and Guido De Roeck; 128(3), 376-7 (2002).

Ricciardelli, Francesco
Mathematical Model for Design of Mass Dampers for Wind Excited Structures. —Massimiliano Mattei and Francesco Ricciardelli; 128(9), 979-88 (2002).

Riemer, Michael F.
Influence of Particle Shape and Surface Friction Variability on Response of Rod-Shaped Particulate Media. —Catherine O'Sullivan, Jonathan D. Bray, and Michael F. Riemer; 128(11), 1182-92 (2002).

Rizos, D. C.
Dynamic and Seismic Analysis of Foundations based on Free Field B-Spline Characteristic Response Histories. —D. C. Rizos and K. G. Loya; 128(4), 438-48 (2002).

Roesset, Jose M.
Effect of Nonlinear Wave Kinematics on Dynamic Response of Spars. —Iftekhar Anam and Jose M. Roesset; 128(9), 925-34 (2002).

Saadeghvaziri, M. A.
Comprehensive Composite Inelastic Fiber Element for Cyclic Analysis of Concrete-Filled Steel Tube Columns. — S. B. B. Aval, M. A. Saadeghvaziri, and A. A. Golafshani; 128(4), 428-37 (2002).

Sadek, Fahim
Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).

Safjan, Andrzej J.
Time-Domain Methods for Solving Problems of Linear Acoustics. — Andrzej J. Safjan; 128(10), 1050-61 (2002).

Sakai, Shigeki
Time Domain Analysis on the Dynamic Response of a Flexible Floating Structure to Waves. — Xiaodong Liu and Shigeki Sakai; 128(1), 48-56 (2002).

Sakamoto, Shigehiro
Polynomial Chaos Decomposition for the Simulation of Non-Gaussian Nonstationary Stochastic Processes. —Shigehiro Sakamoto and Roger Ghanem; 128(2), 190-201 (2002).

Sandberg, Göran E.
Latin Hypercube Sampling for Stochastic Finite Element Analysis. —Anders M. J. Olsson and Göran E. Sandberg; 128(1), 121-5 (2002).

Sapountzakis, E. J.
Creep and Shrinkage Effect on Reinforced Concrete Slab-and-Beam Structures. —E. J. Sapountzakis and J. T. Katsikadelis; 128(6), 625-34 (2002).

Sarkar, M. G.
Torsional Surface Waves in an Initially Stressed Anisotropic Porous Medium. —S. Dey and M. G. Sarkar; 128(2), 184-9 (2002).

Scanlan, Robert H.
Observations on Low-Speed Aeroelasticity. —Robert H. Scanlan; 128(12), 1254-8 (2002).

Schade, Derek T.
Thermoelastic Stability of Layer Bonded to Half Plane. — Derek T. Schade and Dale G. Karr; 128(12), 1285-94 (2002).

Sfer, Domingo
Study of the Behavior of Concrete under Triaxial Compression. — Domingo Sfer, Ignacio Carol, Ravindra Gettu, and Guillermo Etse; 128(2), 156-63 (2002).

Shah, Surendra P.
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. —Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).

Shen, Hui-Shen
Postbuckling of Shear Deformable Laminated Cylindrical Shells. —Hui-Shen Shen; 128(3), 296-307 (2002).
Hygrothermal Effects on the Nonlinear Bending of Shear Deformable Laminated Plates. —Hui-Shen Shen; 128(4), 493-6 (2002).

Shi, Z. Y.
Closure to "Structural Damage Detection from Modal Strain Energy Change" by Z. Y. Shi, S. S. Law, and L. M. Zhang. —Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(3), 377-8 (2002).
Improved Damage Quantification from Elemental Modal Strain Energy Change. —Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).

Shukla, K. K.
Thermomechanical Postbuckling of Cross-Ply Laminated Rectangular Plates. — K. K. Shukla and Y. Nath; 128(1), 93-101 (2002).

Simiu, Emil
Peak Non-Gaussian Wind Effects for Database-Assisted Low-Rise Building Design. — Fahim Sadek and Emil Simiu; 128(5), 530-9 (2002).

Singh, Anand V.
Numerical Analysis for the Nonlinear Free Vibration of Shallow Shells. — Anand V. Singh and Kang Lan; 128(12), 1259-66 (2002).

Sitar, Nicholas
Displacement Accuracy of Discontinuous Deformation Analysis Method Applied to Sliding Block. — David M. Doolin and Nicholas Sitar; 128(11), 1158-68 (2002).

Somadevan, Niranjanan
Microstructural Finite-Element Analysis of Influence of Localized Strain Distribution on Asphalt Mix Properties. —Eyad Masad and Niranjanan Somadevan; 128(10), 1105-14 (2002).

Song, Chung R.
Closure to "Finite Strain Anisotropic Modified Cam Clay Model with Plastic Spin. I: Theory" by George Z. Voyiadjis and Chung R. Song. —George Z. Voyiadjis and Chung R. Song; 128(4), 498 (2002).
Closure to "Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. II: Application to Piezocone Test" by George Z. Voyiadjis and Chung R. Song. —George Z. Voyiadjis and Chung R. Song; 128(5), 600 (2002).

Song, Er-Xiang
Discussion of "Numerical Analysis of Geomaterials within Theory of Porous Media" by Pedro Arduino and Emir Jose Macari. —Jun Yang and Er-Xiang Song; 128(6), 708 (2002).

Spencer, B. F., Jr.
"Smart" Base Isolation Strategies Employing Magnetorheological Dampers. —H. Yoshioka, J. C. Ramallo, and B. F. Spencer, Jr.; 128(5), 540-51 (2002).
Semi-Implicit Integration Algorithm for Stochastic Analysis of Multi-Degree-of-Freedom Structures. — Yasuki Ohtori and B. F. Spencer, Jr.; 128(6), 635-43 (2002).
"Smart" Base Isolation Systems. —J. C. Ramallo, E. A. Johnson, and B. F. Spencer, Jr.; 128(10), 1088-99 (2002).

Stålne, Kristian
Three-Dimensional Model for Analysis of Stiffness and Hygroexpansion Properties of Fiber Composite Materials. —Kristian Stålne and Per-Johan Gustafsson; 128(6), 654-62 (2002).

Sture, Stein
Passing the Baton. —Stein Sture; 128(10), 1023 (2002).

Subramaniam, Kolluru V
Fatigue Fracture of Concrete Subjected to Biaxial Stresses in the Tensile $C-T$ Region. —Kolluru V Subramaniam, John S. Popovics, and Surendra P. Shah; 128(6), 668-76 (2002).

Suetake, Yoshitaka
Element-Free Method Based on Lagrange Polynomial. — Yoshitaka Suetake; 128(2), 231-9 (2002).

Sun, Lu
Spectral Analysis and Parametric Study of Stochastic Pavement Loads. — Lu Sun and Thomas W. Kennedy; 128(3), 318-27 (2002).

Taciroglu, E.
Simple Nonlinear Model for Elastic Response of Cohesionless Granular Materials. — E. Taciroglu and K. D. Hjelmstad; 128(9), 969-78 (2002).

Tassoulas, John L.
Time-Harmonic Analysis of Wave Propagation in Unbounded Layered Strata with Zigzag Boundaries. — Si-Hwan Park and John L. Tassoulas; 128(3), 359-68 (2002).
Collapse of Composite Rings Due to Delamination Buckling Under External Pressure. — Hayder A. Rasheed and John L. Tassoulas; 128(11), 1174-81 (2002).

Thakur, Siddharth
Prediction of Flow in Centrifugal Blower Using Quasi-Steady Rotor–Stator Models. — Siddharth Thakur, Wanlai Lin, and Jeffrey Wright; 128(10), 1039-49 (2002).

Thambiratnam, D. P.
Dynamic Response of Plates on Elastic Foundation to Moving Loads. —M.-H. Huang and D. P. Thambiratnam; 128(9), 1016-22 (2002).

Themelis, Nickolas J.
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. —Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).

Thovert, J.-F.
Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).

Tong, Mai
Temporal a_N and a_T in Earthquake Ground Motion at a Single Point. —Mai Tong, Jincheng Qi, and George C. Lee; 128(5), 502-10 (2002).

Triantafyllou, Michael S.
Generalized-α Time Integration Solutions for Hanging Chain Dynamics. —Jason I. Gobat, Mark A. Grosenbaugh, and Michael S. Triantafyllou; 128(6), 677-87 (2002).

Tsai, Hsiang-Chuan
Stiffness Analysis of Fiber-Reinforced Rectangular Seismic Isolators. —Hsiang-Chuan Tsai and James M. Kelly; 128(4), 462-70 (2002).
Bending Stiffness of Fiber-Reinforced Circular Seismic Isolators. —Hsiang-Chuan Tsai and James M. Kelly; 128(11), 1150-7 (2002).

Ulm, Franz-Josef
Below Macro: Driving Forces of Micromechanics. —Luc Dormieux and Franz-Josef Ulm; 128(8), 807 (2002).
Effect of Inclusions on Friction Coefficient of Highly Filled Composite Materials. —Eric Lemarchand, Franz-Josef Ulm, and Luc Dormieux; 128(8), 876-84 (2002).
Micromechanical Model for Ultrastructural Stiffness of Mineralized Tissues. —Christian Hellmich and Franz-Josef Ulm; 128(8), 898-908 (2002).
Two-Phase Composite Model for High Performance Cementitious Composites. —Eugene Y. Chuang and Franz-Josef Ulm; 128(12), 1314-23 (2002).

Usami, Tsutomu
Three-Dimensional Necking Bifurcation in Tensile Steel Specimens. — Shigenobu Okazawa, Tsutomu Usami, Hirohisa Noguchi, and Fumio Fujii; 128(4), 479-86 (2002).

Ushaksaraei, R.
Failure Criterion for Structural Masonry based on Critical Plane Approach. — R. Ushaksaraei and S. Pietruszczak; 128(7), 769-78 (2002).

Uy, B.
In-Plane Elastic Stability of Arches under a Central Concentrated Load. — M. A. Bradford, B. Uy, and Y.-L. Pi; 128(7), 710-9 (2002).

Very, Kevin
Requirements on Damage Functions. — S. Yazdani, Davis Cope, and Kevin Very; 128(1), 126-9 (2002).

Viola, E.
Formulation of Cracked Beam Element for Structural Analysis. — E. Viola, L. Nobile, and L. Federici; 128(2), 220-30 (2002).

Voyiadjis, George Z.
Closure to "Finite Strain Anisotropic Modified Cam Clay Model with Plastic Spin. I: Theory" by George Z. Voyiadjis and Chung R. Song. —George Z. Voyiadjis and Chung R. Song; 128(4), 498 (2002).
Closure to "Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. II: Application to Piezocone Test" by George Z. Voyiadjis and Chung R. Song. —George Z. Voyiadjis and Chung R. Song; 128(5), 600 (2002).

Waisman, Federico
Non-Gaussian Model for Ringing Phenomena in Offshore Structures. —Federico Waisman, Kurtis Gurley, Mircea Grigoriu, and Ahsan Kareem; 128(7), 730-41 (2002).

Wang, C. Y.
Similarity Shapes of an Inclined, Partially Filled Membrane Container. —C. Y. Wang; 128(2), 249-51 (2002).

Wang, Guanglun
Elasto-Plastic Bonding of Embedded Optical Fiber Sensors in Concrete. —Qingbin Li, Guang Li, Guanglun Wang, Farhad Ansari, and Qingren Liu; 128(4), 471-8 (2002).

Wei, X. X.
Analytic Solution for Finite Transversely Isotropic Circular Cylinders under the Axial Point Load Test. — X. X. Wei and K. T. Chau; 128(2), 209-19 (2002).

Weitsman, Y. Jack
Solution Method for Beams on Nonuniform Elastic Foundations. —Ya-Jun Guo and Y. Jack Weitsman; 128(5), 592-4 (2002).

Wheeler, Simon J.
Discussion of "Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. I: Theory" by George Z. Voyiadjis and Chung R. Song. —Minna Karstunen and Simon J. Wheeler; 128(4), 497-8 (2002).
Discussion of "Finite Strain, Anisotropic Modified Cam Clay Model with Plastic Spin. II: Application to Piezocone Test" by George Z. Voyiadjis and Chung R. Song. —Simon J. Wheeler and Minna Karstunen; 128(5), 599-600 (2002).

Whitaker, Stephen
Mechanics of Composite Solids. — Stephen Whitaker; 128(8), 823-8 (2002).

Wilde, Krzysztof
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. I: Theory. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 264-79 (2002).
Study of Passive Deck-Flaps Flutter Control System on Full Bridge Model. II: Results. — Piotr Omenzetter, Krzysztof Wilde, and Yozo Fujino; 128(3), 280-6 (2002).

Williams, M. S.
Stability and Delay Compensation for Real-Time Substructure Testing. — A. P. Darby, M. S. Williams, and A. Blakeborough; 128(12), 1276-84 (2002).

Wissawapaisal, Komwut
Application of Wigner-Ville Transform to Evaluate Tensile Forces in Seven-Wire Prestressing Strands. — Hung-Liang (Roger) Chen and Komwut Wissawapaisal; 128(11), 1206-14 (2002).

Wong, Kevin K. F.
Earthquake Response and Energy Evaluation of Inelastic Structures. — Kevin K. F. Wong and Rong Yang; 128(3), 308-17 (2002).

Woodson, Stanley C.
Response of 1/4-Scale Concrete Masonry Unit (CMU) Walls to Blast. — Scott T. Dennis, James T. Baylot, and Stanley C. Woodson; 128(2), 134-42 (2002).

Wright, Jeffrey
Prediction of Flow in Centrifugal Blower Using Quasi-Steady Rotor–Stator Models. — Siddharth Thakur, Wanlai Lin, and Jeffrey Wright; 128(10), 1039-49 (2002).

Wu, Jianhua
Wave Diffraction by a Vertical Cylinder with a Porous Ring Plate. — Jianhua Wu and Allen T. Chwang; 128(2), 164-71 (2002).

Wu, Zhishen
Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Yamamoto, Kinya
Redundancy Index of Lifeline Systems. — Masaru Hoshiya and Kinya Yamamoto; 128(9), 961-8 (2002).

Yang, Jun
Discussion of "Numerical Analysis of Geomaterials within Theory of Porous Media" by Pedro Arduino and Emir Jose Macari. — Jun Yang and Er-Xiang Song; 128(6), 708 (2002).
Saturation Effects of Soils on Ground Motion at Free Surface Due to Incident SV Waves. — Jun Yang; 128(12), 1295-303 (2002).

Yang, Rong
Earthquake Response and Energy Evaluation of Inelastic Structures. — Kevin K. F. Wong and Rong Yang; 128(3), 308-17 (2002).

Yang, Zhaohui
Influence of Permeability on Liquefaction-Induced Shear Deformation. — Zhaohui Yang and Ahmed Elgamal; 128(7), 720-9 (2002).

Yazdani, S.
Requirements on Damage Functions. — S. Yazdani, Davis Cope, and Kevin Very; 128(1), 126-9 (2002).

Yoshioka, H.
"Smart" Base Isolation Strategies Employing Magnetorheological Dampers. — H. Yoshioka, J. C. Ramallo, and B. F. Spencer, Jr.; 128(5), 540-51 (2002).

Yousefian, F.
Real Porous Media: Local Geometry and Transports. — P. M. Adler, J.-F. Thovert, S. Bekri, and F. Yousefian; 128(8), 829-39 (2002).

Yu, G. Y.
Stable Boundary Element Method/Finite Element Method Procedure for Dynamic Fluid–Structure Interactions. — G. Y. Yu, S. T. Lie, and S. C. Fan; 128(9), 909-15 (2002).

Yuan, Hong
Stress Transfer and Fracture Propagation in Different Kinds of Adhesive Joints. — Zhishen Wu, Hong Yuan, and Hedong Niu; 128(5), 562-73 (2002).

Yue, Dongyi
Anisotropic Elastoplastic Bounding Surface Model for Cohesive Soils. — Hoe I. Ling, Dongyi Yue, Victor N. Kaliakin, and Nickolas J. Themelis; 128(7), 748-58 (2002).

Yuen, Ka-Veng
Bayesian Modal Updating using Complete Input and Incomplete Response Noisy Measurements. — Ka-Veng Yuen and Lambros S. Katafygiotis; 128(3), 340-50 (2002).

Zaoui, André
Continuum Micromechanics: Survey. — André Zaoui; 128(8), 808-16 (2002).

Zhang, L. M.
Closure to "Structural Damage Detection from Modal Strain Energy Change" by Z. Y. Shi, S. S. Law, and L. M. Zhang. — Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(3), 377-8 (2002).
Improved Damage Quantification from Elemental Modal Strain Energy Change. — Z. Y. Shi, S. S. Law, and L. M. Zhang; 128(5), 521-9 (2002).

Zhang, Yunfeng
Protecting Base-Isolated Structures from Near-Field Ground Motion by Tuned Interaction Damper. — Yunfeng Zhang and Wilfred D. Iwan; 128(3), 287-95 (2002).

Zhao, X.
Vibration of Axially Loaded Rotating Cross-Ply Laminated Cylindrical Shells via Ritz Method. — K. M. Liew, T. Y. Ng, and X. Zhao; 128(9), 1001-7 (2002).

Zhao, Yan-Gang
Closure to "New Approximation for SORM: Parts 1 and 2" by Yan-Gang Zhao and Tetsuro Ono. — Yan-Gang Zhao and Tetsuro Ono; 128(1), 131-2 (2002).

Zhou, Yin
Mode Shape Corrections for Wind Load Effects. — Yin Zhou, Ahsan Kareem, and Ming Gu; 128(1), 15-23 (2002).

Zhou, Yong
Why Did the World Trade Center Collapse?—Simple Analysis. — Zdeněk P. Bažant and Yong Zhou; 128(1), 2-6 (2002).
Addendum to "Why Did the World Trade Center Collapse?—Simple Analysis". — Zdeněk P. Bažant and Yong Zhou; 128(3), 369-70 (2002).

Zhu, X. Q.
Moving Loads Identification Through Regularization. — X. Q. Zhu and S. S. Law; 128(9), 989-1000 (2002).

Zi, Goangseup
Continuous Relaxation Spectrum for Concrete Creep and its Incorporation into Microplane Model M4. — Goangseup Zi and Zdeněk P. Bažant; 128(12), 1331-6 (2002).

Zou, Guiping
Higher-Order Finite Strip Method for Postbuckling Analysis of Imperfect Composite Plates. — Guiping Zou and Pizhong Qiao; 128(9), 1008-15 (2002).
Local Buckling of Elastically Restrained Fiber-Reinforced Plastic Plates and its Application to Box Sections. — Pizhong Qiao and Guiping Zou; 128(12), 1324-30 (2002).
